PETNF 2024

PETNF Dog House Heater Instruction Manual

Model: 2024

1. Introduction

Thank you for choosing the PETNF Dog House Heater. This manual provides essential information for the safe and efficient operation of your new heater. Designed to provide gentle, consistent warmth, this heater is suitable for various outdoor pet enclosures, ensuring comfort for your animals during colder temperatures.

Key Features:

- **Wide Temperature Range:** Adjustable from 32°F (0°C) to 122°F (50°C).
- **Convection Heating:** Provides mild, even, and comfortable warmth without a fan.
- **Near-Silent Operation:** Ideal for noise-sensitive pets.
- **Overheat Protection:** Automatically shuts off at 158°F (70°C) for safety.
- **Chew-Resistant Cord:** 6.6ft (2m) cord designed to prevent damage from pets.
- **Durable Design:** IPX5 waterproof rating and durable metal surface for outdoor use.

2. Safety Instructions

Please read all safety instructions carefully before installation and operation. Failure to follow these instructions may result in electric shock, fire, or injury.

- **Electrical Safety:** Ensure the power outlet matches the heater's voltage (110 Volts). Do not overload circuits.
- **Placement:** Mount the heater securely to a wall in the pet enclosure. Ensure adequate clearance from flammable materials.
- **Overheat Protection:** The heater is equipped with an automatic overheat protection system. If the internal temperature exceeds 158°F (70°C), the unit will temporarily shut off. It will resume operation once it cools down.
- **Chew-Resistant Cord:** The 6.6ft cord is designed to resist chewing. However, regularly inspect the cord for any signs of damage. If damaged, discontinue use immediately and contact support.
- **Water Exposure:** The heater has an IPX5 waterproof rating, making it suitable for outdoor use. However, avoid submerging the unit or exposing it to direct, high-pressure water jets.

- **Supervision:** While designed for safety, periodic checks of the heater and pet enclosure are recommended, especially during initial use.
- **Maintenance:** Disconnect power before cleaning or performing any maintenance.

3. Package Contents

Verify that all items are present in the package:

- PETNF Dog House Heater Unit
- Mounting Screws and Wall Anchors (typically 4 sets)
- Keys for Protective Door Panel (2 keys)
- Instruction Manual (this document)

Image: The PETNF Dog House Heater with its dimensions (14.8 inches wide, 11.8 inches high, 3.66 inches deep) and the included mounting screws, wall anchors, and two keys.

4. Setup and Installation

The PETNF Dog House Heater is designed for wall mounting within an outdoor pet enclosure.

1. **Choose a Location:** Select a suitable wall inside the dog house, chicken coop, cat barn, or rabbit cage. Ensure the location is protected from direct weather exposure and allows for proper air circulation around the heater. Avoid placing it where pets can easily obstruct the heat output or access the rear of the unit.

2. **Mark Mounting Points:** Hold the heater against the chosen wall and mark the positions for the mounting screws. Ensure the heater is level.
3. **Drill Pilot Holes:** Drill pilot holes at the marked positions. If mounting into wood, drill appropriate size holes for the screws. If mounting into drywall or other materials, use the provided wall anchors.
4. **Secure the Heater:** Align the heater with the drilled holes and secure it firmly to the wall using the provided screws.
5. **Cable Management:** Route the chew-resistant power cord safely to a grounded outdoor-rated electrical outlet. Ensure the cord is not pinched or exposed to potential damage.

5. Operating Instructions

The PETNF Dog House Heater features a simple and intuitive control system.

1. **Connect Power:** Plug the heater's power cord into a suitable 110V grounded electrical outlet.
2. **Access Controls:** Use the provided key to unlock and open the protective door panel located on the side of the

heater.

3. **Power On/Off:** Locate the power switch inside the panel. Flip the switch to the 'I' position to turn the heater ON, and to the 'O' position to turn it OFF.
4. **Adjust Temperature:** Rotate the thermostat knob to set the desired temperature. The temperature range is 32°F (0°C) to 122°F (50°C). Start with a lower setting and adjust as needed to maintain a comfortable environment for your pet. The heater will cycle on and off to maintain the set temperature.
5. **Close Protective Panel:** Once settings are adjusted, close and lock the protective door panel to prevent accidental changes or pet interference.

6. Maintenance

Regular maintenance ensures optimal performance and longevity of your PETNF Dog House Heater.

- **Cleaning:** Disconnect the heater from the power supply before cleaning. Use a soft, damp cloth to wipe the exterior surfaces. Do not use abrasive cleaners or immerse the unit in water.
- **Cord Inspection:** Periodically inspect the power cord for any cuts, fraying, or other damage. If damage is found, discontinue use and seek professional repair or replacement.
- **Ventilation:** Ensure the heater's air intake and output vents remain clear of debris, dust, or pet hair to maintain efficient operation and prevent overheating.
- **Storage:** If storing the heater for an extended period, clean it thoroughly and store it in a dry, protected area.

7. Troubleshooting

If you encounter issues with your PETNF Dog House Heater, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Heater does not turn on.	No power, power switch off, or tripped circuit breaker.	Check power connection, ensure switch is ON, reset circuit breaker if necessary.
Heater turns on but does not heat.	Thermostat set too low, or overheat protection activated.	Increase thermostat setting. If overheat protection activated, allow unit to cool down.
Heater is not heating the enclosure sufficiently.	Enclosure too large, poor insulation, or extreme external temperatures.	Ensure enclosure is adequately insulated. Adjust thermostat to a higher setting. Consider additional insulation for the pet house.
Unusual odors or sounds.	New unit burn-off (initial use), or internal component issue.	A slight odor during first use is normal. If odors or sounds persist, discontinue use and contact customer support.

8. Specifications

Feature	Specification
Brand	PETNF
Model Number	2024
Power	400 Watts
Voltage	110 Volts
Temperature Range	32°F - 122°F (0°C - 50°C)
Overheat Protection	Automatic shut-off at 158°F (70°C)
Cord Length	6.6 ft (Chew-Resistant)
Dimensions (D x W x H)	0.7" x 14" x 11" (1.78cm x 35.56cm x 27.94cm)

Feature	Specification
Item Weight	7.7 pounds (3.5 kg)
Indoor/Outdoor Usage	Outdoor
Mounting Type	Wall Mount
Heating Coverage	71-120 cubic feet
Special Features	400W rapid heating, Overheat Protection, easy to operate with thermostat knob, ultra-quiet operation

9. Warranty and Support

PETNF products are manufactured to high-quality standards. This product comes with a standard manufacturer's warranty against defects in materials and workmanship. Please refer to the product packaging or contact PETNF customer service for specific warranty details and duration.

For technical support, troubleshooting assistance, or warranty claims, please contact PETNF customer service through the retailer where the product was purchased or visit the official PETNF website.
