Safety Information

Please read all safety instructions carefully before using the product to ensure safe and proper operation.

- Do not expose the speaker to extreme temperatures, direct sunlight, or excessive moisture.
- Ensure proper connection to avoid damage to the speaker or your CB radio.
- Do not attempt to disassemble or repair the speaker yourself. Refer to qualified service personnel for any repairs.
- Keep out of reach of children and pets.

Package Contents

Verify that all items are present in your package:

- PNI DE750 External Speaker
- Mounting Kit (bracket and screws)

Product Overview

Familiarize yourself with the components and controls of your PNI DE750 External Speaker.

Front View

Image: This image displays the front of the PNI DE750 external speaker, highlighting the speaker grille, the Noise Filter switch (black), and the Mute (-8dB) switch (red).

- **Speaker Grille**: Protects the internal speaker and allows sound to project.
- **Noise Filter Switch**: Activates or deactivates the noise filter function to reduce background static.
- **Mute (-8dB) Switch**: Reduces the audio output by 8 decibels for temporary volume reduction.

Side View

Image: This image shows the side profile of the PNI DE750 external speaker, including the adjustable mounting knob and the robust casing.

- **Mounting Knobs**: Used to adjust the angle of the speaker when mounted on its bracket.

Rear View

Image: This image shows the rear of the PNI DE750 external speaker, including the attached audio cable with a 3.5mm jack.

- **Audio Cable (3.5mm Jack)**: Connects the speaker to your CB radio's external speaker output.

Setup

Mounting the Speaker

The PNI DE750 speaker comes with a mounting kit for easy installation in your vehicle or operating area.

1. Choose a suitable, stable location that allows for optimal sound projection and secure mounting.
2. Use the provided mounting bracket and screws to securely attach the speaker to a flat surface.
3. Adjust the angle of the speaker using the side mounting knobs for the best listening position.

Connecting to your CB Radio

1. Locate the external speaker jack on your CB radio. This is typically a 3.5mm audio jack.
2. Insert the 3.5mm jack from the PNI DE750 speaker's audio cable firmly into the external speaker jack on your CB radio.
3. Ensure the connection is secure to prevent audio interruptions.

Operating Instructions

Powering On/Off

The PNI DE750 speaker draws power directly from the CB radio's audio output. There is no separate power switch for the speaker itself. It will operate when connected to a powered CB radio.

Adjusting Volume

The primary volume control for the external speaker is managed via your CB radio's volume knob.

Using the Noise Filter

The Noise Filter function helps to reduce background static and interference, providing clearer audio, especially in noisy environments.

1. To activate the noise filter, slide the **Noise Filter** switch (black) to the "ON" position.
2. To deactivate the noise filter, slide the switch to the "OFF" position.

Using the Mute (-8dB) Function

The Mute (-8dB) switch allows for a quick reduction in volume by 8 decibels, useful for temporary quiet moments without fully muting the audio.

1. To reduce the volume by 8dB, slide the **Mute (-8dB)** switch (red) to the "ON" position.
2. To return to normal volume, slide the switch to the "OFF" position.

Maintenance

Cleaning

To maintain the speaker's appearance and performance:

- Wipe the exterior with a soft, dry cloth.
- Do not use abrasive cleaners, solvents, or strong chemicals.
- Avoid spraying liquids directly onto the speaker grille or openings.

Storage

When not in use for extended periods, store the speaker in a cool, dry place, away from direct sunlight and extreme temperatures.

Troubleshooting

If you encounter issues with your PNI DE750 External Speaker, refer to the table below for common problems and their solutions.

Problem	Possible Cause	Solution
No Sound	Speaker not connected properly.	Ensure the 3.5mm jack is fully inserted into the CB radio's external speaker port.
No Sound	CB radio volume too low or muted.	Increase the volume on your CB radio. Check if the CB radio's internal speaker is muted or if an external speaker option needs to be enabled.
Distorted Sound	Volume too high on CB radio.	Reduce the volume on your CB radio.
Distorted Sound	Loose connection.	Re-seat the 3.5mm jack firmly.

Problem	Possible Cause	Solution
Excessive Noise/Static	Noise filter is off.	Activate the Noise Filter switch on the speaker.
Volume is too low	Mute (-8dB) function is active.	Deactivate the Mute (-8dB) switch on the speaker.

Specifications

Detailed technical specifications for the PNI DE750 External Speaker.

Feature	Detail
Model Name	PNI-DE750
Impedance	8 Ohm
Maximum Output Power	4 W
Dimensions (L x W x H)	130 x 45 x 98 mm (13D x 9.8W x 4.5H cm)
Cable Length	1.8 m
Connector Type	3.5mm Audio Jack
Material	Acrylonitrile Butadiene Styrene (ABS)
Colour	Black
Functions	Noise Filter, Mute (-8dB)
Item Weight	253 g
