PKPOWER USB Charging Cable (for NBJU TC-001)

PKPOWER USB Charging Cable for NBJU TC-001 Bark Collar

Instruction Manual

Introduction

This manual provides essential instructions for the safe and effective use of your PKPOWER USB Charging Cable, designed specifically for the NBJU TC-001 Bark Collar. Please read this manual thoroughly before use and retain it for future reference.

Product Overview

The PKPOWER USB Charging Cable is a replacement or spare power lead cord for the NBJU TC-001 Bark Collar. It features a standard USB-A connector on one end and a micro-USB connector on the other, facilitating convenient charging from various USB power sources.

Image 1: The PKPOWER USB Charging Cable, shown coiled. It features a standard USB-A connector on the left and a micro-USB connector on the right.

Setup

1. **Identify Connectors:** Locate the standard USB-A connector (larger, rectangular) and the micro-USB connector (smaller, trapezoidal).
2. **Connect to Power Source:** Insert the USB-A connector into a compatible USB power source. This can be a USB wall adapter (not included), a computer's USB port, or a power bank. Ensure the power source provides 100-240V input.
3. **Connect to Bark Collar:** Carefully insert the micro-USB connector into the charging port of your NBJU TC-001 Bark Collar. Ensure the connector is oriented correctly to avoid damage. Do not force the connector.

Image 2: Close-up view of the PKPOWER USB Charging Cable, highlighting the USB-A connector on the left and the micro-USB connector on the right, ready for connection.

Operating Instructions (Charging)

Once the cable is properly connected to both a power source and the NBJU TC-001 Bark Collar, the collar should begin charging. Refer to your NBJU TC-001 Bark Collar's instruction manual for specific charging indicators (e.g., LED lights) and estimated charging times.

- Ensure all connections are secure before charging.
- Do not use the cable if it appears damaged.
- Always use a certified USB power adapter.

Maintenance

Proper care will extend the life of your charging cable:

- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling or bending the cable sharply.
- **Cleaning:** If necessary, gently wipe the cable with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.
- **Handling:** Always grasp the connector ends when plugging or unplugging the cable. Avoid pulling directly on the cable itself, as this can damage the internal wires.
- **Inspection:** Periodically inspect the cable for any signs of wear, fraying, or damage to the insulation or connectors. Discontinue use if damage is observed.

Troubleshooting

If your NBJU TC-001 Bark Collar is not charging:

- **Check Connections:** Ensure both the USB-A and micro-USB connectors are fully and securely inserted into their respective ports.
- **Verify Power Source:** Try plugging the USB-A connector into a different USB port or a different USB wall adapter to rule out a faulty power source.
- **Inspect Cable:** Examine the entire length of the cable for any visible damage, such as cuts, kinks, or bent pins on the connectors. If damaged, replace the cable.
- **Collar Issue:** If the cable and power source are confirmed to be working, the issue might be with the NBJU TC-001 Bark Collar itself. Refer to the collar's manual or contact its manufacturer for support.

Specifications

Feature	Specification
Cable Length	5 feet (approximately 1.5 meters)
Input Voltage Compatibility	100-240V (via USB power source)
Connector Type (Source)	USB-A Male
Connector Type (Device)	Micro-USB Male
Cable Type	USB Power Lead Cord
Compatible Device	NBJU TC-001 Bark Collar for Dogs
Color	Black
Safety Certification	FCC Tested
Durability	Extremely Flexible and Durable
Product Dimensions	3 x 2 x 0.5 inches (packaging/cable coiled)
Item Weight	2 ounces
