This infographic summarizes the main features of the VORGUT monitor set, including 4MP high-definition, PIR human detection, completely wireless solar power, dual-band Wi-Fi, IP66 waterproof/dustproof, 3-link alarm, 2 recording modes, and 5-year warranty support.

Operating Instructions

1. Pan/Tilt/Zoom (PTZ) Control

The camera features pan-tilt functionality, allowing you to remotely adjust the surveillance angle (up/down 0-90°, left/right 0-355°) directly from your smartphone app. This ensures comprehensive coverage without blind spots.

This image illustrates the VORGUT security camera's extensive 360-degree coverage, including 355-degree horizontal and 90-degree vertical rotation, controllable via a smartphone app. The camera is mounted on a house, with a phone displaying its live feed.

2. Motion Detection and Alerts

The camera utilizes PIR human detection to accurately identify human figures and trigger alerts. Upon detection, you will receive a push notification with a photo to your smartphone. The system can also activate an alarm sound and sensor light to deter intruders.

- **Smart Detection:** Reduces false alarms by focusing on human movement.
- **Night Light Emission Deterrence:** Alarm sound and sensor light activate simultaneously against intruders.
- **Color Night Vision:** Provides clear, full-color footage even in low-light conditions.

This image demonstrates the camera's smart detection feature, which sends real-time alerts to a smartphone when a person is detected, minimizing false alarms. A delivery person is shown at a doorstep, with a phone displaying a notification.

The image compares the camera's color night vision (with spotlight on) and infrared night vision (with spotlight off), showcasing its ability to capture clear footage in various low-light conditions.

4. Recording Modes

The system offers flexible recording options to suit your needs:

- **Motion Detection Recording:** Records only when motion is detected, saving storage space and power.
- **Continuous Recording:** Provides 24/7 surveillance.

Maintenance

Weather Resistance

The VORGUT security camera boasts an IP66 waterproof and dustproof rating, ensuring reliable operation in various weather conditions, including heavy rain and dust. Regular cleaning of the lens and solar panel is recommended to maintain optimal performance.

Troubleshooting

If you encounter any issues with your VORGUT security camera system, please refer to the following common troubleshooting steps:

- **No Power:** Ensure all power adapters are securely connected to both the camera and the monitor. Verify that the power outlets are functional.
- **No Video Feed:** Check Wi-Fi connectivity for both the camera and the monitor. Ensure the camera is within range of the Wi-Fi signal. Restart both the camera and the monitor.
- **Poor Video Quality:** Ensure the camera lens is clean. Check your Wi-Fi signal strength; a weak signal can affect video quality.
- **Motion Detection Issues:** Verify that motion detection is enabled in the app settings. Adjust the sensitivity level and detection areas as needed.
- **App Connectivity Problems:** Ensure your smartphone has a stable internet connection. Restart the EseeCloud app and try reconnecting.
