Campbell ULTSQBOTTLE

Campbell Ultrafiltration+ Water Filter Bottle - 16 fl. oz. User Manual

Model: ULTSQBOTTLE

Introduction

This manual provides detailed instructions for the proper use and maintenance of your Campbell Ultrafiltration+ Water Filter Bottle. Designed for convenient access to cleaner, better-tasting water, this reusable bottle is ideal for daily use, travel, and outdoor activities. Please read these instructions carefully before first use to ensure optimal performance and longevity of your product.

Figure 1: The Campbell Ultrafiltration+ Water Filter Bottle.

Product Overview

The Campbell Ultrafiltration+ Water Filter Bottle is engineered to provide effective filtration on the go. It consists of three main components:

- **Bottle Body:** The main container for water, made from durable, BPA-Free plastic.
- **Cap Assembly:** Includes the mouthpiece and a removable lid.
- **Replaceable Filter:** An ultrafiltration membrane designed to reduce contaminants.

Figure 2: Exploded view of the Campbell Ultrafiltration+ Water Filter Bottle, highlighting the removable lid and replaceable filter.

Setup Instructions

1. **Initial Cleaning:** Before first use, wash the bottle body and cap assembly (without the filter) in a dishwasher or by hand with warm, soapy water. Rinse thoroughly.
2. **Filter Installation:** Ensure the filter is securely seated within the cap assembly. The filter is designed to fit snugly.
3. **First Fill:** Fill the bottle with water. Screw the cap assembly tightly onto the bottle.
4. **Prime the Filter:** Take a few sips to draw water through the filter. The first few sips may contain air or a slight carbon taste; this is normal. Discard the first full bottle of filtered water to ensure the filter is fully primed.

Operating Instructions

Using your Campbell Ultrafiltration+ Water Filter Bottle is straightforward:

- **Filling:** Unscrew the cap assembly and fill the bottle with water from a tap, stream, or other source. Ensure the water source is not chemically contaminated or saltwater.

- **Drinking:** Close the cap securely. Open the mouthpiece and sip directly from the bottle. The filter will purify the water as you drink.
- **Important Note:** Do not use with hot water, as this can damage the filter membrane. The bottle is designed for use with cold or room-temperature water only.

Maintenance and Care

Proper maintenance ensures the longevity and effectiveness of your filter bottle.

- **Bottle Cleaning:** The bottle body and cap (without the filter) are dishwasher safe. Place them on the top rack of your dishwasher. For hand washing, use warm, soapy water and rinse thoroughly.
- **Filter Care:** The filter itself does not require cleaning. Do not attempt to wash or scrub the filter, as this can damage the membrane.
- **Filter Replacement:** The filter has a lifespan of approximately 25 gallons of water, or about 2-3 months with regular use. Replace the filter when water flow significantly decreases or after the recommended lifespan, whichever comes first. Replacement filters are sold separately.

- **Storage:** When not in use for extended periods, ensure the bottle and filter are dry. Store in a cool, dry place.

Troubleshooting

Problem	Possible Cause	Solution
Slow water flow	Filter is clogged or nearing end of life.	Replace the filter. Ensure the filter is properly seated.
Unusual taste in water	New filter not fully primed, or filter needs replacement.	Discard the first bottle of water with a new filter. If taste persists or filter is old, replace the filter.
Leaking from cap	Cap not screwed on tightly, or seal is damaged.	Ensure cap is securely tightened. Inspect the cap and bottle threads for damage.

Specifications

Feature	Detail
Brand	Campbell
Model Number	ULTSQBOTTLE
Capacity	16 Fluid Ounces
Material	Plastic (BPA-Free)
Filter Type	Ultrafiltration
Filter Lifespan	Approx. 25 gallons or 2-3 months
Product Care	Bottle and cap are dishwasher safe (top rack). Filter is not dishwasher safe.
Item Weight	4 ounces
UPC	088409145188
