- **Cleaning:** Wipe the fabric surfaces with a damp cloth. For stubborn stains, use a mild fabric cleaner and blot gently. Do not saturate the fabric.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, bleach, or strong chemical solvents, as these can

damage the fabric and materials.

- **Spills:** Blot spills immediately with a clean, dry cloth.
- **Sunlight Exposure:** Avoid prolonged exposure to direct sunlight to prevent fading of the fabric.
- **Weight Distribution:** When storing items, distribute weight evenly to prevent stress on the base.

6. Troubleshooting

Problem	Possible Cause	Solution
Ottoman feels unstable after assembly.	Bottom support panel not fully inserted or placed incorrectly.	Ensure the bottom support panel is fully pressed down and flat inside the base. Check that the ottoman is on a level surface.
Lid does not sit flush.	Ottoman base not fully unfolded or items inside are obstructing the lid.	Verify the ottoman base is fully expanded. Rearrange contents inside to ensure they do not protrude above the rim.
Difficulty folding the ottoman.	Bottom support panel not removed.	Remove the lid and the bottom support panel before attempting to collapse the sides of the ottoman.
