Eisblock XPX CPU Water Block

Read the safety instructions before starting the installation.

<https://www.alphacool.com/download/SAFETY%20INSTRUCTIONS.pdf>

NOTE: All Alphacool Eisblock XPX CPU coolers are mounted identically on the CPU socket. In the event of deviations, this is explicitly stated in these Manuals.

Eisblock XPX

Accessories

 A 2x LGA 2066, LGA 115x, LGA 1200, LGA 1700 Support	 B 2x AM4 / AM5 Support	 C 1x Backplate /	 D 1x Thermal paste /	 E 4x Rubber caps /
 F 4x AM4 / AM5 Screws /	 G 4x LGA 115x, LGA 1200, LGA 1700 Screws /	 H 4x LGA 2066 Screws /	 I 4x Screw caps / Schrauben-	 J 4x Springs /
 K 4x 2mm Washer / Rondelle	 L 4x 0,5mm Washer / Rondelle			

1x Digital-RGB adapter

Only with: 12946 – Alphacool Eisblock XPX Aurora – Acryl Black

12947 – Alphacool Eisblock XPX Aurora – Acryl Chrome

12948 – Alphacool Eisblock XPX Aurora Edge – Acryl Black

12949 – Alphacool Eisblock XPX Aurora Edge – Acryl Chrome

5x G1/4 Screw plugs

Only with: 12961 – Alphacool Eisblock XPX 1U – Black Acetal

1x Tool

Only with: 12961 – Alphacool Eisblock XPX 1U – Black Acetal

LGA 115x / 1200 / 1700 / 2066

AM4 / AM5

**Preparation
Only XPX 1U**

Select the suitable connection options. All connections with a max. diameter of 18mm are compatible.

You can use each inlet and outlet, all IN and OUT can be combined with each other. Screw in the screw caps with the enclosed tool.

Eisblock XPX

Preparation

Remove the protective film on the cooler plate.

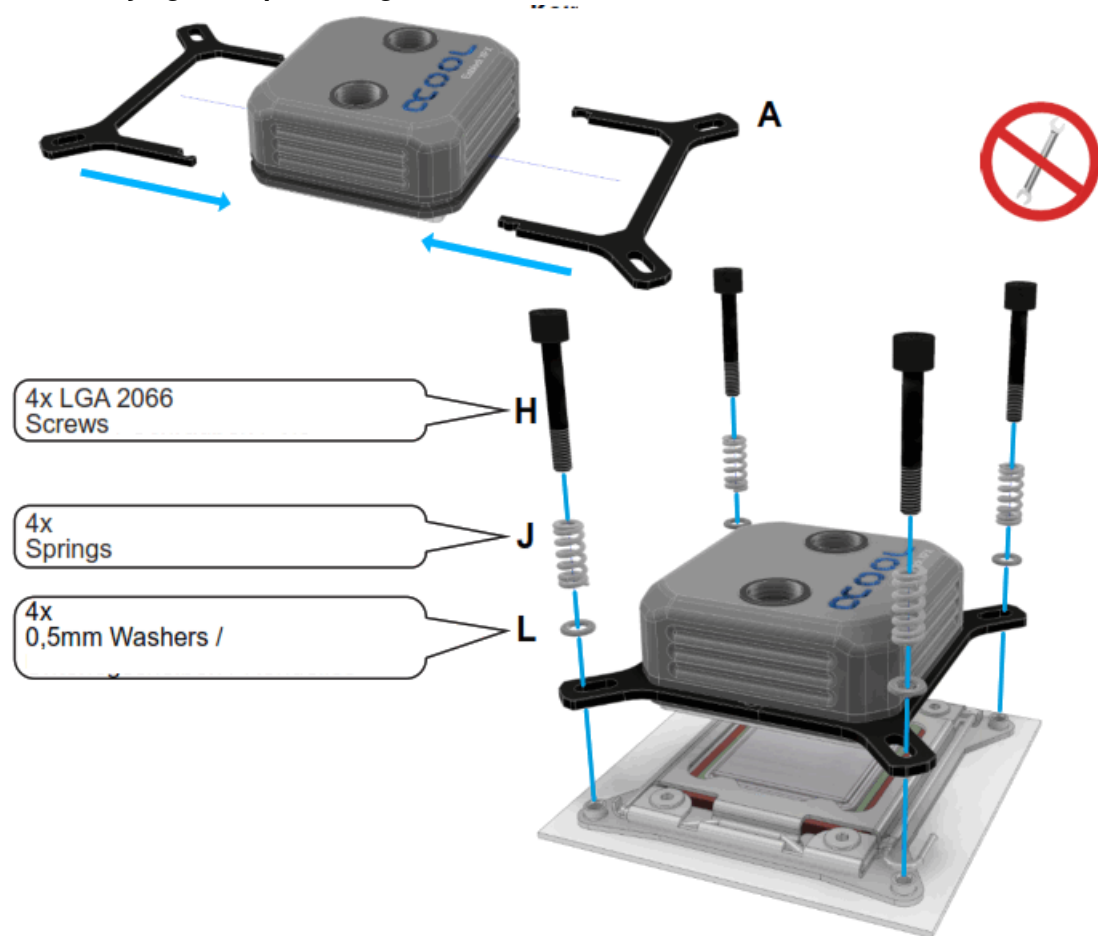

After you have dismantled your old cooler clean the hardware first:

1. Remove residues of the thermal paste from the CPU.
2. Use a cloth or cotton swab to help. With isopropanol alcohol, you can also remove dried heat-conducting paste.

3. Apply a pea-sized blob of thermal paste to the CPU.
4. Spread the paste with the aid of a plastic strip or similato form an even, thin layer (<0,5mm layer thickness).

LGA 2066 Mounting

Do not use tools, only tighten up hand-tight!

1. Select the appropriate bracket and plug it together.
2. The LGA 2066 screws are put through the pressure springs, washers and the holder. Then everything is mounted on the socket.

LGA 1700 Mounting

1. Select the appropriate Bracket and plug it together.
2. Remove the protective film from the backplate.
3. Fix the backplate to the back of the mainboard with the tape. The LGA 1700 screws are inserted through the pressure springs, washers and the holder. Then everything is mounted on the socket.

LGA 115x Mounting LGA 1200 Mounting

1. Select the appropriate Bracket and plug it together.
2. Remove the protective film from the backplate.
3. Fix the backplate to the back of the mainboard with the tape. The LGA 115x / 1200 screws are inserted through the pressure springs, washers and the holder. Then everything is mounted on the socket.

AM4 / AM5 Mounting

1. Select the appropriate bracket and plug it together.
2. The AM4 / AM5 screws are put through the pressure springs, washers and the holder. Then everything is mounted on the socket.

Screws – Caps

Put the rubber and screw caps on the screws as shown.

NOTE: If you are using a 3-pin fan connector, make sure that the voltage is set to 12V in the bios. This is not necessary for PWM connections.

Alphacool Eisblock XPX CPU – Deep Black

Digital RGB connection

To control the digital – RGB lighting, connect the included adapter to the 3 – pin female connector and plug it to a digital – RGB controller (e.g. Alphacool Aurora Eiscontrol, Art.: 15360, not included). You can connect additional digital – RGB LEDs to the remaining 3 – pin male connector.

Alphacool Eisblock XPX polished clear/satin clear RGB/Digital RGB Frame

The Alphacool Eisblock XPX CPU Cooler – polished Clear and – satin Clear are not illuminated. Alphacool offers 3 optional lighting frames. 12942 Digital RGB – Black 12893 RGB – Black 12932 RGB – Chrome
