AlphaTheta PLX-CRSS12 Firmware Change History

Product Information
Specifications

- Product Name: PLX-CRSS12
- Firmware Version: 1.10 (July 11, 2024 update)
- Compliance: Ecodesign Directive (Directive 2009/125/EC) of the European Union
- Power Management Function: Automatically switches off after 20 minutes when activated

Activating Power Management

1. Locate the Power Management setting in the device menu.
2. Toggle the setting to turn on the Power Management function.
3. The device will now automatically switch off after 20 minutes of inactivity.

FAQs

Q: What changes were made in firmware version 1.10 (July 11, 2024 update)?

A: In this update, the time needed for the unit to automatically switch off when the Power Management function is turned on has been changed to 20 minutes to comply with the Ecodesign Directive.

PLX-CRSS12 firmware – change history ver. 1.10 (July 11, 2024 update)

[FIXED]

Following the Ecodesign Directive (Directive 2009/125/EC) of the European Union, the time needed for the unit to automatically switch off has been changed to 20 minutes when the Power Management function is turned on.

Please note

- The name of the energy-saving function, (previously called Auto Standby or Auto Power-Off, depending on the model), has now been changed to Power Management.
- To learn more about the Power Management function, see the latest Instruction Manual, which is available online.
