Safety Information

Your safety and the safety of others are very important. We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

- **Electrical Safety:** Ensure the refrigerator is connected to a grounded electrical outlet. Do not use extension cords.
- **Water Connection:** For models with an internal water dispenser, connect to a potable water supply only.
- **Child Safety:** Do not allow children to play in or around the refrigerator. Proper disposal of old refrigerators is crucial to prevent child entrapment.
- **Flammable Materials:** Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- **Moving the Appliance:** Use caution when moving the refrigerator to avoid damaging flooring or the appliance itself.

Setup and Installation

Unpacking Your Refrigerator

Remove all packaging materials, tape, and protective film from the refrigerator. Clean any adhesive residue with a mild soap and water solution, then wipe dry.

Location Requirements

Choose a location near a grounded electrical outlet. Avoid direct sunlight or heat sources. Ensure adequate clearance around the refrigerator for proper air circulation and door opening.

Leveling the Refrigerator

Your refrigerator has adjustable leveling legs. Use a level to ensure the appliance is stable and level. This prevents vibration and ensures proper door sealing.

Water Line Connection (for Internal Water Dispenser)

A cold water supply line is required for the internal water dispenser and ice maker. Refer to the detailed plumbing instructions provided in a separate installation guide or consult a qualified plumber. Ensure all connections are secure and leak-free before plugging in the refrigerator.

Operating Instructions

Initial Startup

After plugging in the refrigerator, allow it to cool for several hours before loading with food. The internal temperature will stabilize over time.

Temperature Control

The refrigerator features an internal control panel for adjusting temperatures. The recommended temperature setting for the fresh food compartment is 37°F (3°C) and for the freezer compartment is 0°F (-18°C).

Internal Storage Features

Your refrigerator is equipped with various storage options designed for optimal food preservation.

- **Adjustable Glass Shelves:** Customize shelf height to accommodate taller items.
- **Crisper Drawers:** Designed to maintain optimal humidity levels for fruits and vegetables.

Care and Maintenance

Cleaning Your Refrigerator

Regular cleaning helps maintain the appearance and efficiency of your appliance.

- **Interior:** Wash removable parts and interior surfaces with a mild soap and warm water solution. Rinse and dry thoroughly.
- **Exterior:** Clean stainless steel surfaces with a stainless steel cleaner. For other finishes, use a mild soap and water solution.
- **Door Gaskets:** Clean door gaskets regularly to ensure a tight seal.

Water Filter Replacement

The internal water dispenser and ice maker use a water filter. Replace the filter every 6 months or when the filter indicator light illuminates, whichever comes first. Refer to the control panel for filter status and replacement instructions.

Air Filter Replacement (if applicable)

Some models may include an air filter to reduce odors. Replace the air filter as indicated by the control panel or every 6 months.

Troubleshooting

Before calling for service, review this section. It may save you the cost of a service call.

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Refrigerator does not operate.	Not plugged in; circuit breaker tripped; power outage.	Ensure plug is secure; reset breaker; check house power.
Temperatures are too warm.	Door left open; heavy food load; temperature setting too high.	Check door seal; allow time for cooling after loading; adjust temperature setting.
Water dispenser not working.	Water supply turned off; water filter clogged; air in system.	Check water valve; replace water filter; dispense water for 2-3 minutes to clear air.
No ice production.	Ice maker turned off; water supply issue; ice bin full.	Ensure ice maker is on; check water supply; empty ice bin.
