ALTIMIUM MAT.USB44U3C USB 3.2 5Gbps Matrix

Specifications

- Product Name: USB 3.2 5Gbps Matrix – MAT.USB44U3C
- Allows 4 computers to share 4 USB 3.2 Gen1 devices
- Data transfer speed up to 5 Gbps
- Supports 5V 1.5A output for USB device ports
- High stability and reliability with overcurrent, short-circuit, and interference protection
- Cross-platform support for Windows, Linux, and Mac

- Control options: front panel buttons, remote control, RS-232, TCP/IP
- No driver required

Product Usage Instructions

Connection Setup:

- Connect the USB devices to the USB ports on the USB Matrix.
- Connect the USB Matrix to the computers using appropriate cables.

Power On:

- Ensure all connected devices are powered off.
- Plug in the power supply to the USB Matrix and turn it on.

Device Selection:

Use the front panel buttons, remote control, or other control options to select the desired device connected to the USB Matrix.

Data Transfer:

Data transfer between the selected device and the connected computer will occur at speeds of up to 5 Gbps.

Power Output:

The USB device ports provide a stable 5V 1.5A output for connected devices like keyboards, mice, cameras, etc.
