Setup Instructions

The HIROHRTV Triple Bunk Bed is designed for straightforward assembly. It features a tool-free assembly system with color-coded components to simplify the process. Assembly typically takes approximately 90 minutes with basic household tools.

Before You Begin:

- Unpack all components and verify against the parts list (not provided in this manual, refer to packaging).
- Ensure you have adequate space for assembly.
- Gather necessary tools (e.g., Allen wrench, screwdriver - typically included or standard).
- It is recommended to have at least two adults for assembly.

Assembly Steps:

1. **Frame Assembly:** Follow the color-coded instructions to connect the main frame components. Ensure all bolts are tightened using the zero-squeak bolt tightening system to prevent noise and ensure stability.
2. **Slat Installation:** Install the two extra-thick slats on each bed level to provide robust mattress support and prevent sagging.
3. **Guardrail Attachment:** Securely attach the full-length safety rails to the upper and middle bunk levels. These guardrails have a 12-inch height for safety.
4. **Ladder Placement:** Attach the anti-slip ladder. The ladder features textured rungs and dual mounting sides for flexible placement and secure access.
5. **Trundle Assembly:** Assemble the bonus storage trundle according to the instructions. This trundle can be used for an additional mattress or for storage.
6. **Wall Anchors:** For enhanced safety, especially in earthquake-prone areas, utilize the included wall anchors to secure the bunk bed to a wall.

Convertible Design:

This bunk bed system offers flexible configuration options:

- **L-shaped Triple Bunk Beds:** The standard configuration for space-saving.
- **Three Individual Twin Beds:** The modular design allows for reconfiguration into three separate twin beds without complete disassembly.

Operating Instructions

General Use:

- Each bed level is designed to support up to 800 lbs. Do not exceed this weight limit.
- Ensure mattresses are appropriately sized for twin beds and do not exceed the height of the guardrails on upper and middle bunks.
- The trundle bed can accommodate a standard twin mattress or be used for storage.

Safety Guidelines:

- Always use the ladder for accessing upper and middle bunks. Do not climb on the frame.
- Ensure all guardrails are securely in place before use. The removable guardrail design allows for customized protection, but they must be properly installed when in use.
- Do not allow children under 6 years of age on the upper bunk.
- Periodically check all connections and bolts to ensure they remain tight.
- Do not attach or hang items from any part of the bunk bed that are not designed for use with the bed; for example, but not limited to, hooks, belts, or jump ropes.

Maintenance

Cleaning:

- Wipe down the metal frame with a soft, damp cloth.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the industrial-strength powder coating.
- Promptly clean any spills to prevent staining.

Regular Inspection:

- Periodically inspect all bolts, screws, and connections to ensure they are tight. Re-tighten as necessary.
- Check the condition of the slats and guardrails for any signs of wear or damage.
- Ensure the ladder is securely attached and stable.

Troubleshooting

- **Squeaking Noises:** If the bed produces squeaking noises, check all bolts and connections. The zero-squeak bolt tightening system is designed to prevent this, but loose connections can develop over time. Re-tighten all fasteners.
- **Instability/Wobbling:** Ensure the bed is placed on a level surface. Verify that all frame components are correctly assembled and all bolts are fully tightened. If wall anchors are not used, consider installing them for added stability.
- **Difficulty with Trundle Movement:** Check for any obstructions under the trundle. Ensure the wheels are clean and free of debris.
- **Damaged or Missing Parts:** Refer to the Warranty and Support section for information on obtaining replacement parts.
