GOFJAJHQ i5 Young / i5 Bink / i9 EYE

GOFJAJHQ Replacement HEPA Filter Kit for Midea i5 Young / i5 Bink / i9 EYE Robotic Vacuum Cleaner

Instruction Manual - 3 PCS Filter

1. Introduction

This instruction manual provides essential information for the installation and maintenance of your GOFJAJHQ Replacement HEPA Filter Kit, designed for Midea i5 Young, i5 Bink, and i9 EYE Robotic Vacuum Cleaners. Regular replacement of these filters is crucial for maintaining optimal cleaning performance and extending the lifespan of your robotic vacuum cleaner.

2. Product Overview

The GOFJAJHQ Replacement HEPA Filter Kit includes three (3) high-efficiency particulate air (HEPA) filters. These filters are designed to capture fine dust, allergens, and other particles, ensuring cleaner air and efficient vacuum operation.

3. Installation Guide

Follow these general steps to replace the HEPA filter in your Midea robotic vacuum cleaner. Refer to your specific vacuum cleaner's user manual for detailed instructions if needed.

1. **Power Off:** Ensure your robotic vacuum cleaner is powered off and disconnected from its charging base before beginning any maintenance.
2. **Locate Dust Bin:** Open the top cover of your robotic vacuum cleaner and remove the dust bin.
3. **Remove Old Filter:** Open the dust bin cover. The old HEPA filter is typically located within the dust bin. Carefully remove the old filter, disposing of it properly.
4. **Insert New Filter:** Take a new GOFJAJHQ HEPA filter. Ensure the filter is oriented correctly and gently slide it into the designated slot within the dust bin until it sits securely.
5. **Reassemble:** Close the dust bin cover, reinsert the dust bin into the vacuum cleaner, and close the top cover.

4. Operating Considerations

Once the new HEPA filter is installed, your robotic vacuum cleaner is ready for operation. Proper filter installation ensures optimal suction power and effective air filtration. If you notice any unusual noises or reduced performance after installation, recheck the filter's seating within the dust bin.

5. Maintenance

Regular maintenance of your HEPA filters is essential for consistent cleaning performance.

- **Cleaning:** It is recommended to gently tap the filter to remove loose dust and debris after each use or as needed. Do not wash HEPA filters with water, as this can damage the filter material and reduce its effectiveness.
- **Replacement Frequency:** For optimal performance, replace the HEPA filter every 1 to 3 months, depending on usage frequency and the amount of debris collected. Regular replacement prevents reduced suction, excessive noise, and potential damage to the vacuum's motor.

6. Troubleshooting

If you encounter issues after replacing your HEPA filter, consider the following:

- **Reduced Suction:** Ensure the new filter is correctly seated and the dust bin is properly closed and inserted into the vacuum. A clogged filter can also cause reduced suction, indicating it might be time for a replacement.
- **Unusual Noise:** Check that the filter is installed correctly and not obstructing any moving parts. Worn or improperly installed filters can sometimes lead to increased operational noise.
- **Error Messages:** If your vacuum displays an error message, consult your Midea robotic vacuum cleaner's main user manual for specific error code interpretations and solutions.

7. Specifications

Brand	GOFJAJHQ
Compatible Models	Midea i5 Young, Midea i5 Bink, Midea i9 EYE Robotic Vacuum Cleaner
Item Type	HEPA Filter
Quantity	3 Pieces
Item Weight	Approximately 1.76 ounces (total package)
Package Dimensions	Approximately 0.39 x 0.39 x 0.39 inches

8. Warranty and Support

For warranty information or product support, please contact the seller, sensen tao, or the manufacturer, GOFJAJHQ, directly. Keep your purchase receipt as proof of purchase.

Ask a question about this manual

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
