KMM LT-155

KMM Handheld Car Vacuum Cleaner

Model: LT-155 Instruction Manual

Introduction

Thank you for choosing the KMM Handheld Car Vacuum Cleaner, Model LT-155. This versatile 2-in-1 device functions as both a powerful vacuum cleaner and an air duster, designed for efficient cleaning in your car, home, office, or for outdoor activities. Featuring 16,000PA suction power, a 120W high-performance motor, and a 5200mAh rechargeable battery, this cordless unit offers convenience and strong cleaning capabilities. Please read this manual thoroughly before use to ensure proper operation and maintenance.

The KMM Handheld Car Vacuum Cleaner, Model LT-155.

Safety Information

- Do not use the vacuum cleaner near flammable liquids or gases.
- Keep the device away from water and moisture. Do not immerse in water.
- Ensure the charging cable is not damaged before use.
- Do not allow children to operate the vacuum cleaner without supervision.
- Clean filters regularly to maintain optimal performance and prevent motor overheating.
- Store the device in a cool, dry place when not in use.

Package Contents

The KMM Handheld Car Vacuum Cleaner package includes the following items:

- 1 x Cordless Vacuum Cleaner Main Unit

- 1 x Air Bleed Nozzle
- 1 x Inflatable Nozzle
- 1 x Blowing Nozzle
- 1 x Suction Nozzle
- 1 x Brush Blow Nozzle
- 1 x Brush Suction Nozzle
- 1 x Floor Brush
- Metal & HEPA Filters (pre-installed, plus spare)
- 1 x Type-C Charging Cable
- 1 x User Manual

All components included in the package.

Product Overview

The KMM Handheld Car Vacuum Cleaner is designed for versatility and ease of use. It features a powerful motor for both suction and blowing functions, a transparent dust cup, and an integrated LED light for illuminating dark areas.

- **Main Unit:** Houses the motor, battery, and dust collection system.
- **Dust Cup:** Transparent container for collecting debris, with a 200mL capacity.
- **Filters:** Dual filtration system with a metal filter and a HEPA filter, both washable and reusable.
- **Power Button:** Activates the vacuum/blower function.
- **LED Light:** Built-in light to assist in cleaning dimly lit spaces.
- **Type-C Charging Port:** For convenient recharging.

Key features of the KMM Handheld Car Vacuum Cleaner.

Setup

1. Initial Charging

Before first use, fully charge the vacuum cleaner. Connect the provided Type-C charging cable to the device and a compatible power source (car charger, power bank, laptop, or 5V/2A adapter). The charging indicator light will be red during charging and turn green when fully charged. A full charge takes approximately 3 hours and provides up to 30 minutes of runtime.

Charging the device using the Type-C port.

2. Attaching Nozzles

Select the appropriate nozzle for your cleaning task. Nozzles can be attached to either the suction port (front) for vacuuming or the exhaust port (rear) for blowing/inflating/air bleeding. Simply push the desired nozzle firmly onto the port until it is securely in place.

Operating Instructions

The KMM Handheld Car Vacuum Cleaner offers both suction and blowing functionalities, along with inflation and air bleed capabilities, making it highly versatile.

1. Suction Mode (Vacuuming)

Attach the desired suction nozzle to the front port of the vacuum cleaner. Press the power button to turn on the device. The powerful 16,000PA suction will effectively pick up dust, crumbs, pet hair, and debris.

- **Floor Brush:** Ideal for cleaning larger surfaces like car floors, mats, and furniture.
- **Suction Nozzle:** Designed for reaching tight gaps, corners, and crevices such as car doors, seat edges, and dashboard vents.
- **Brush Suction Nozzle:** Combines suction with a brush for effective cleaning and wiping of seat cushions and AC vents.

Using various suction nozzles for different cleaning needs.

2. Blowing Mode (Air Duster)

Attach the desired blowing nozzle to the rear exhaust port of the vacuum cleaner. Press the power button to activate the blowing function. This mode is useful for dislodging dust from hard-to-reach areas.

- **Blowing Nozzle:** Perfect for blasting dust from keyboards, window gaps, and other delicate electronics or tight spaces.
- **Brush Blow Nozzle:** Allows for simultaneous wiping and blowing, effective for cleaning intricate surfaces.

Utilizing blowing nozzles for dusting and inflation.

3. Inflation and Air Bleed Functions

The device also supports inflation and air bleed tasks for various items.

- **Inflatable Nozzle:** Attach to the rear exhaust port to inflate items such as swim rings, balloons, and small air mattresses.
- **Air Bleed Nozzle:** Attach to the rear exhaust port to evacuate air from vacuum storage bags or deflate air mattresses.

Using the air bleed nozzle for inflation and air evacuation.

4. LED Light

The built-in LED light automatically illuminates when the device is powered on, helping to reveal hidden dust and debris in dark areas like under car seats or furniture.

Maintenance

Regular maintenance ensures optimal performance and extends the lifespan of your KMM Handheld Car Vacuum Cleaner.

1. Emptying the Dust Cup

When the dust cup is full, or after each use, empty it by pressing the one-click emptying button. This allows for quick and hygienic disposal of collected debris without direct contact.

2. Cleaning the Filters

The metal and HEPA filters are washable and reusable. For optimal suction, clean them regularly:

1. Twist and remove the dust cup from the main unit.
2. Carefully remove both the metal and HEPA filters from the dust cup.
3. Rinse the filters under running water until clean.
4. Allow the filters to air dry completely before reinstallation. Ensure they are thoroughly dry to prevent damage to the motor and maintain suction power.
5. Reassemble the filters and dust cup onto the main unit.

Steps for cleaning the dust cup and filters.

Troubleshooting

Problem	Possible Cause	Solution
Low suction power	Dust cup is full; Filters are clogged; Filters are wet.	Empty the dust cup; Clean and dry the filters thoroughly.
Device does not turn on	Battery is depleted; Device is not charged.	Charge the device fully using the Type-C cable.
Device not charging	Charging cable is faulty; Power adapter is not working; Charging port is dirty.	Try a different Type-C cable and power adapter; Clean the charging port gently.
Unusual noise during operation	Obstruction in the nozzle or air path; Damaged motor.	Check and clear any obstructions; If noise persists, contact customer service.
