amaran P60c RGBWW LED Panel Instruction Manual

Thank you for purchasing the amaran series LED photography light-amaran P60c.

The amaran P60c is a RGBWW full-color adjustable panel photography light with adjustable temperature (2500K-7500K), power of 60w, and maximum illuminance of 5900lux@1m (5600K). The P60c is also excellent in terms of light quality, with a color rendering index of up to CRI95+, TLCI 97, G/M adjustable and no flicker at all.

The amaran P60 series is creators' best choice because of its feature of lightweight and flexibility.

IMPORTANT SAFETY INSTRUCTIONS

When using this unit, basic safety precautions should always be followed, including the following:

1. Read and understand all instructions before using.
2. Close supervision is necessary when any fixture is used by or near children. Do not leave the fixture unattended while in use.
3. Care must be taken as burns can occur from touching hot surfaces.
4. Do not operate the fixture if a cord is damaged, or if the fixture has been dropped or damaged, until it has been examined by qualified service personnel.
5. Position any power cables such that they will not be tripped over, pulled, or put into contact with hot surfaces.
6. If an extension cord is necessary, a cord with an amperage rating at least equal to that of the fixture should be used. Cords rated for less amperage than the fixture may overheat.
7. Always unplug the lighting fixture from the electrical outlet before cleaning and servicing, or when not in use. Never yank the cord to remove the plug from the outlet.
8. Let the lighting fixture cool completely before storing.
9. To reduce the risk of electric shock, do not immerse this fixture in water or any other liquids.
10. To reduce the risk of re or electric shock, do not disassemble this fixture. Contact cs@aputure.com or take it to qualified service personnel when service or repair work is required. Incorrect reassembly may cause electric shock when the lighting fixture is in use.
11. The use of an accessory attachment not recommended by the manufacturer may increase the risk of re, electric shock, or injury to any persons operating the fixture.
12. Power this fixture by connecting it to a grounded outlet.
13. Please do not place the LED lighting fixture near any flammable object.

14. Only use a dry microfiber cloth to clean the product.
15. Please have the product checked by an authorized service personnel agent if your product has a problem.
16. The malfunctions caused by unauthorized disassembly are not covered under the warranty.
17. We recommend only using the original Aputure cable accessories. Please note that our warranty for this product does not apply to any repairs required due to any malfunctions of unauthorized Aputure accessories, although you may request such repairs for a fee.
18. This product is certified by RoHS, CE, KC, PSE, and FCC. Please operate the product in full compliance with the operation standards. Please note that this warranty does not apply to repairs arising from malfunctions, although you may request such repairs on a chargeable basis.
19. The instructions and information in this manual are based on thorough, controlled company testing procedures. Further notice will not be given if the design or specifications change.

SAVE THESE INSTRUCTIONS

FCC compliance statement

This device complies with Part 15 of the FCC rules. The operating equipment must meet the following two conditions:

1. This device will not cause harmful interference;
2. This device can withstand any external interference, including interference that may cause unintended operation.

[Warning] If the user makes changes or modifications without the express permission of Aitus, he may lose the right to continue to operate the device.

[Note] This device has been tested and determined to comply with the limits of a Class B digital device (in accordance with Part 15 of the FCC rules).

These limits are designed to provide reasonable protection from harmful interference in residential installations. This device generates, uses, and can radiate radio frequency energy. If it is not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, under certain installation conditions, there is no guarantee that such interference will not occur. If this equipment does cause harmful interference to radio or television reception, and this can be determined by turning off and on the equipment, it is recommended that the user try one or more of the following measures to eliminate the interference:

- Increase the distance between the equipment and the receiver.
- Connect the equipment to an outlet on another circuit, not the outlet on the circuit to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

FCC radiation exposure statement

This device complies with FCC radiation exposure limits for uncontrolled environments.
