Product Description

1. The 2091 particulate filter is made of high electrostatic filter material, consisting of non-woven fabric, melt blown fabric and hot air cotton, with 14 layers of filtration, which can effectively filter oil and non-oil based particulate contaminants with a filtration efficiency of 99.97%.

Product Features

1. High-efficiency filtration: 2091 particulate filter adopts advanced high-efficiency filtration technology, which can effectively filter tiny particles and harmful substances in the air.
2. Comfortable to wear: The filter is made of soft and comfortable material, which ensures comfort when wearing for a long time. Do not alter, abuse or misuse this respirator.
3. Sealing: The product is designed with a high-efficiency gasket to ensure that the user's breathing area is isolated from the outside environment, effectively preventing the intrusion of harmful substances.
4. Versatility: The 2091 particulate filter is suitable for use in a wide range of environments, including industrial operations, petrochemicals, mining, construction sites and outdoor activities.

Assembly Instructions

Step 1.

Step 2.

Step 3.

1. Align the cartridge or filter notch with facepiece mark.
2. Turn cartridge or filter 1/4 turn clockwise to stop. To remove cartridge, turn 1/4 turn counter clockwise.
3. Repeat with second cartridge or filter.

Care and Maintenance

1. Regularly check the condition of the filter wool and mask to ensure proper functioning.

2. Replace the filter wool regularly according to the instructions provided by the manufacturer.

Contact Information

If you have any questions about this product or need technical support, please contact us at

This instruction manual is intended to provide the user with guidance on the use and maintenance of the cotton particulate filter. It is important that all relevant regulations and standards are observed and that the product is used in accordance with its actual condition.

Usage

1. Wearing a mask: Ensure that you are wearing a mask or respirator that is suitable for 2091 particulate filter . Follow the instructions on the mask or respirator.
2. Replacing the particulate filter: Replace the particulate filter regularly, depending on the frequency of use and environmental conditions. If you notice breathing difficulties or reduced filtration, replace the filter pads immediately.
3. Storage: Before and after use, store the filter pads in a dry, ventilated place away from direct sunlight and high temperatures.

Safety Precautions

1. Use 2091 particulate filter wool only for specified applications and in accordance with relevant regulations and standards.
2. This product is not intended for use in oxygen-thinning environments or where a proper seal cannot be established.
3. If the product is damaged or contaminated, replace the filter wool immediately.
4. If you experience any symptoms of discomfort (such as difficulty breathing or dizziness), discontinue use and seek medical attention.
