Product Description

Set Up your Smart Outdoor Plug with Alexa

- Download the latest version of the Alexa app from the app store.
 - Connect the outdoor plug to the receptacle.
 - Open the Alexa app and tap the “More” icon on the bottom-right side of the screen.
 - Tap “Add a Device”.
 - Select “Plug” -> “Amazon Basics”, then select your corresponding device, and follow the on-screen instructions.
- If prompted by the app, scan the 2D barcode on the back of the device or on the back page of the Quick Start

Guide.

- The device is set up as two separate outlets in the Alexa app which can be individually controlled. Follow the on-screen instructions to rename each outlet.

Use your Smart Outdoor Plug with Alexa

To use your device with Alexa, just say, “Alexa, turn on the first plug”.

Having Trouble with your Smart Outdoor Plug?

Restart your device first to see if it resolves the problem. To restart, unplug the device from the receptacle and plug it back in. If you have restarted your device and it still is not working, do a factory reset: Press and hold the power button (B) with the “outlet 2” marking for 10 seconds. Release the button once you see the outlet 2 indicator blinking green and red alternatively. When the outlet 2 indicator blinks green, the reset is complete. Then set up the device again.
