Operating Instructions

Drawer Operation:

The drawers are designed with smooth sliding tracks for easy opening and closing. The top two drawers are suitable for smaller items, while the bottom drawer is spacious enough to accommodate larger folders. The bottom drawer also features an adjustable hanging rail for A4/Letter size files.

Mobility:

The cabinet is equipped with four casters for easy movement. Two front casters are lockable to secure the cabinet in place. Unlock the casters to move the cabinet and lock them to prevent unintended movement.

Image: Highlights the swivel and lockable casters for flexible placement and stability.

Cable Management:

The open shelving section includes dual cable management holes to help organize wires from electronic devices such as printers or chargers.

Maintenance

The cabinet is constructed from durable MDF board with a scratch-resistant and water-repellent finish. To maintain its appearance and longevity:

- Wipe clean with a damp cloth.
- Avoid using harsh chemicals or abrasive cleaners.
- Promptly wipe up any spills to prevent water damage.

- Avoid placing extremely hot items directly on the surface without protection.

Image: Highlights the material properties of the wooden board, including water-proof, wear-resistant, heat-resistant, and safe & reliable.

Troubleshooting

Drawers not sliding smoothly or not aligning:

- Ensure that the drawer slides are correctly installed and aligned. Refer to the assembly videos for proper orientation.
- Check that all screws securing the slides are flattened and not crooked. Improperly installed screws can obstruct smooth movement.
- If a drawer does not go in smoothly, gently pull it out and re-insert it, ensuring it is aligned with the tracks.

Screws not tightening:

- Verify that you are using the correct screws for each step as indicated in the manual.
- Avoid over-tightening screws, as this can strip the wood and prevent proper fastening.
- If a hole is stripped, consider using wood glue and a toothpick to fill the hole, letting it dry, and then re-inserting the screw.

Warranty and Support

For any manufacturing defects or issues with parts, please contact DUMOS customer support. While specific warranty details are not provided here, the manufacturer is known for responsive support in addressing product concerns.

Please retain your purchase receipt for any warranty claims.
