Amazon Basics B005EJH6Z4 Wireless Mouse with USB Nano Receiver

Guide

1. Find a USB nano Receiver, open the battery cover, take out the receiver

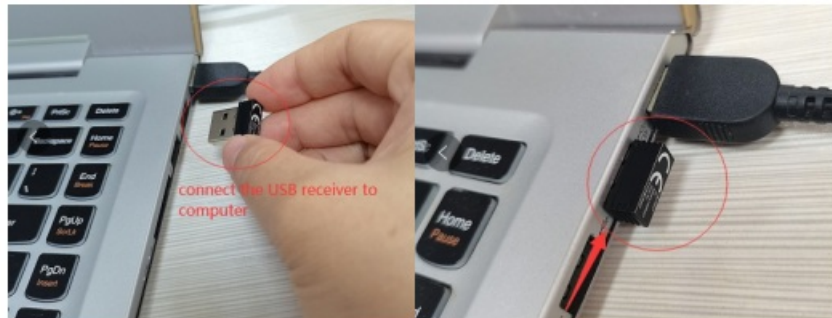

2. Install the battery (take out the battery from the box, check battery + and – and battery size)

3. Close the battery cover

4. Connect the USB receiver to your computer

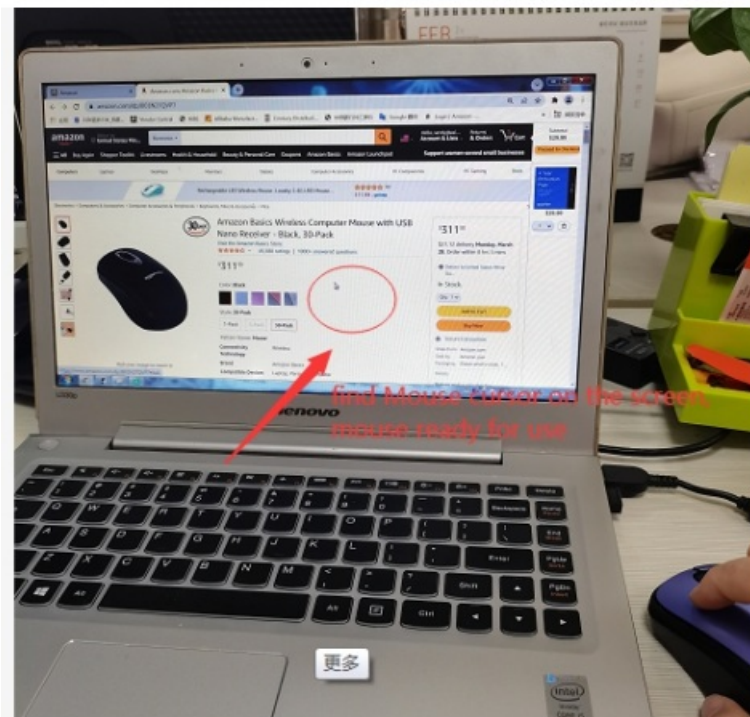

5. Power on

6. Power on switch, Light/ Sensor came on for few seconds Red color and off ,the same time battery power on indicator light on few seconds(power on/off, light /sensor came on for few seconds and off is for power-saving design, battery can use more long time)

7. you will find the mouse cursor, on the computer, Ready for use

8. Use after several months, If the battery low Voltage indicator always Blinks, this remind you to need prepare new battery waiting for replacement
