Troubleshooting

If you encounter any issues with your bar stools, consider the following common solutions:

- **Wobbling Stool:** If a stool wobbles, check the adjustable leveling feet at the bottom of each leg. Rotate them to extend or retract until the stool is stable on your floor surface. Also, ensure all assembly bolts are tightened.
- **Loose Connections:** Over time, screws and bolts may loosen. Periodically inspect and tighten all fasteners to maintain the structural integrity and safety of the stool.
- **Stains on Upholstery:** For most spills, the PU leather can be wiped clean with a dry or slightly damp cloth. For stubborn stains, a mild soap solution can be used, followed by wiping with a clean, dry cloth. Test any cleaning solution on an inconspicuous area first.
