LIONO B0FSRGQ6KY

LIONO Air Tracker Tag for Vehicles

iOS Car Locator & Charger User Manual

Model: B0FSRGQ6KY

Introduction

The LIONO Air Tracker Tag is a versatile 2-in-1 device designed to help you locate your vehicle and charge your mobile devices. It functions as a discreet car charger with integrated tracking capabilities, utilizing the Apple Find My network. This device features a built-in rechargeable battery, allowing it to operate even when unplugged from the vehicle's power source.

Important Note: This device is compatible with iOS devices (iPhone, iPad, Mac) only and is NOT compatible with Android. Location updates are not real-time and depend on the proximity of other Apple devices within the Find My network.

Package Contents

- LIONO Air Tracker Tag (GPS Tracker)
- Built-in Rechargeable Battery
- Vehicle-mounted charger (integrated into the tracker)

Setup

Follow these steps for initial activation and pairing with your iOS device:

1. **Initial Activation:** With the vehicle powered on, plug the LIONO Air Tracker Tag into the cigarette lighter socket. The device will perform an initial power-up and activation. A startup sound will indicate successful activation.

Image: Visual guide for iOS installation and usage steps, including plugging the device into the car's cigarette lighter and navigating the Find My app.

2. **Pairing with Apple Find My:**
    - Ensure Bluetooth is enabled on your iPhone or iPad.
    - Launch the "Find My" app on your iOS device.
    - Navigate to the "Items" tab and select "Add Other Item."
    - The app will detect the "Smart Car Kit." Tap to connect.
    - Follow the on-screen prompts to name your device and assign an icon.
    - Enter your Apple ID to activate the features. Your current location will then be displayed within the Find My app.

Must-See Before First Use -- iOS Car Charger & Tracker

Video: "Must-See Before First Use -- iOS Car Charger & Tracker" by LionoDirect. This video provides a visual guide on how to set up and use the LIONO Air Tracker Tag for the first time, specifically for iOS devices.

Operating Instructions

Vehicle Tracking

Once paired, you can track your vehicle's location using the Apple Find My app on your iPhone, iPad, or Mac. The tracker leverages the global Apple Find My network, which means its location is updated when it comes within range of any compatible Apple device. This is not a real-time GPS tracker; location updates may have a delay depending on network activity.

- Open the Find My app on your iOS device.
- Select the LIONO Air Tracker Tag from your list of items.
- View its last known location on the map. You can also play a sound to help locate it when nearby.

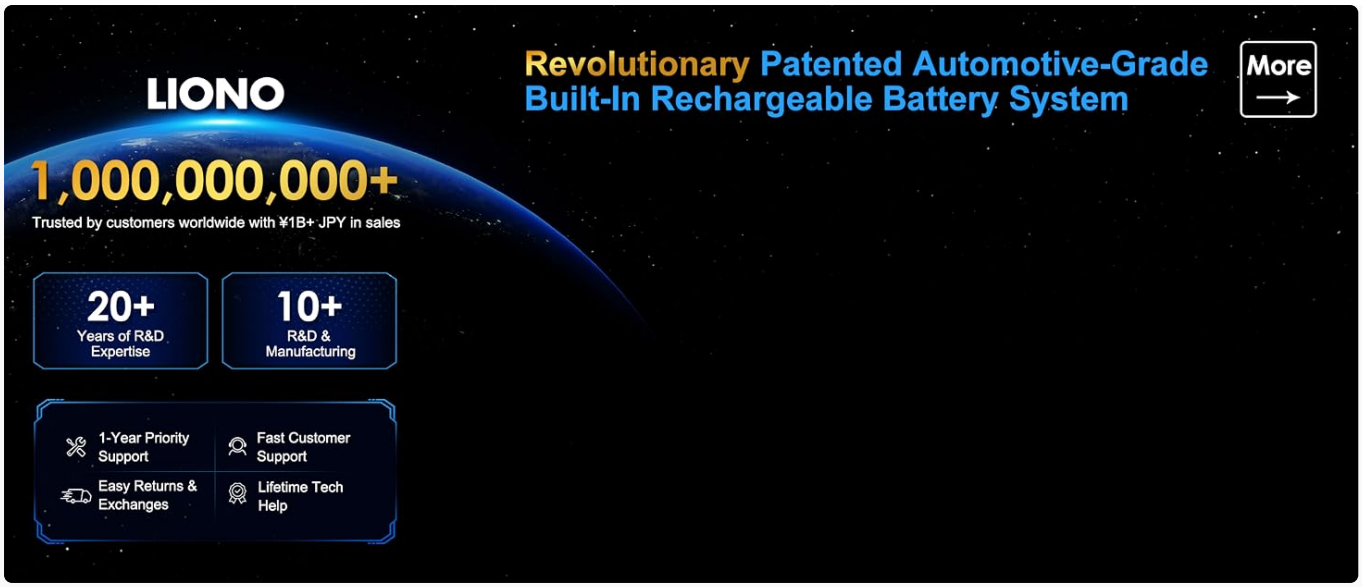

Image: This diagram illustrates the tracking process, showing how the LIONO tracker communicates with nearby Apple devices to update its location on the Find My network.

Charging Function

The LIONO Air Tracker Tag also functions as a dual-port car charger. It includes both USB-A and USB-C ports for charging various devices.

- **USB-A Port:** Provides power output for compatible devices.
- **USB-C Port:** Provides power output for compatible devices, supporting up to 20W when used simultaneously with the USB-A port.

Image: This image highlights the 2-in-1 functionality of the device, showcasing its charging ports and the internal battery.

Maintenance

Battery Management

The LIONO Air Tracker Tag features a built-in rechargeable battery. When the device is plugged into your vehicle's cigarette lighter socket and the vehicle is on, the battery will automatically charge. When unplugged or the vehicle is off,

the internal battery provides power for tracking for up to 3 months in standby mode.

Image: This graphic illustrates the advantage of the LIONO tracker's built-in battery, allowing it to continue functioning even when the vehicle's engine is off, unlike other trackers.

General Care

- Keep the device clean and free from dust and debris.
- Avoid exposing the device to extreme temperatures or moisture.
- Do not attempt to disassemble or repair the device yourself.

Troubleshooting

Issue	Possible Cause	Solution
Device not activating/no startup sound.	Not properly plugged in; vehicle power off; device discharged.	Ensure the device is firmly seated in the cigarette lighter socket. Confirm the vehicle's power is on. If the device has been stored for a long time, it may need to be plugged in for a few minutes to charge its internal battery before activation.
Location updates are delayed or inaccurate.	This is not a real-time GPS tracker; reliance on Apple Find My network.	The LIONO Air Tracker Tag relies on nearby Apple devices to update its location. In areas with fewer Apple devices, updates may be less frequent. This is normal operation for this type of tracker.
Cannot pair with Apple Find My.	Bluetooth off; device not activated; interference.	Ensure Bluetooth is enabled on your iOS device. Confirm the tracker has made its startup sound. Try moving to a different location to reduce potential interference. Restart your iOS device and try again.
Need to return the device.	Privacy and data security concerns.	For your privacy and data security, please unpair and remove the device from your Apple Find My account before returning it. This ensures your personal information is protected and the device can be set up by the next user.

Specifications

- **Brand:** LIONO
- **Model Number:** LIONO GPS Tracker for Vehicles
- **Connectivity Technology:** USB
- **Connector Type:** USB Type-A, USB Type-C
- **Compatible Devices:** iPhone, iPad (iOS Only)
