SIMPLI-MAGIC 79651

Simpli-Magic 35-Quart Commercial Mop Bucket with Side Press Wringer and Caution Sign

Model: 79651

Product Overview

The Simpli-Magic Commercial Mop Bucket system is designed for efficient and safe floor cleaning in various environments. This comprehensive kit includes a 35-quart mop bucket with a side-press wringer, a mop pole with a mop head, and a bright yellow wet floor caution sign. Constructed from durable, corrosion-resistant polyethylene, the system is built for heavy-duty use and features non-marking swivel casters for easy mobility.

Key Features:

- **35-Quart Capacity Mop Bucket:** Designed for commercial and industrial use, suitable for homes, offices, hotels, hospitals, banks, and restaurants.
- **Side Press Wringer:** Extracts excess liquid from the mop, funneling it back into the basin. Engineered for up to 50,000 wringing cycles.
- **Non-Marking Swiveling Casters:** Four wheels provide convenient and mess-free mobility over smooth floor surfaces.
- **Wet Floor Caution Sign:** Bright yellow with bold lettering and a falling person icon, visible from a long distance to promote safety.
- **Complete Mop Set:** Includes a mop pole and mop head for immediate use.

Setup and Assembly

Follow these steps to assemble your Simpli-Magic Mop Bucket system:

1. **Attach Casters:** Insert the four non-marking swivel casters into the designated slots on the bottom of the mop bucket. Ensure they are securely fitted for stable mobility.
2. **Install Wringer:** Position the side press wringer onto the rim of the mop bucket. Align the wringer's hooks or clips with the bucket's edges and press down firmly until it locks into place.
3. **Assemble Mop Pole and Head:** Screw the mop head onto the threaded end of the mop pole until it is tight and secure.

4. **Prepare Caution Sign:** Unfold the wet floor caution sign to form an A-frame. Place it in a visible location before and during cleaning operations.

Operating Instructions

Using your Simpli-Magic Mop Bucket system is straightforward:

1. **Fill the Bucket:** Fill the mop bucket with your preferred cleaning solution and water, ensuring not to exceed the maximum fill line.
2. **Place Caution Sign:** Before beginning to mop, place the wet floor caution sign in a prominent location to alert individuals to potential slip hazards.
3. **Wet the Mop:** Dip the mop head into the cleaning solution in the bucket, ensuring it is fully saturated.

4. **Wring the Mop:** Place the saturated mop head into the wringer basket. Press down on the wringer handle to extract excess liquid. The side-press mechanism efficiently funnels the water back into the bucket. Repeat until the desired mop dampness is achieved.
5. **Mop the Floor:** Begin mopping the floor area, working in sections. Overlap strokes to ensure thorough cleaning.
6. **Empty and Clean:** After use, empty the dirty water from the bucket and rinse thoroughly. Clean the mop head and wringer as described in the Maintenance section.

Image: A bright yellow wet floor caution sign with bold black lettering and a falling person icon, indicating its high visibility and safety promotion.

Maintenance and Care

Proper maintenance ensures the longevity and effectiveness of your cleaning system:

- **Bucket Cleaning:** After each use, empty the dirty water. Rinse the bucket thoroughly with clean water. For deeper cleaning, use a mild detergent and a brush to remove any residue.
- **Wringer Care:** Periodically inspect the wringer for any debris or buildup. Rinse it with water and clean with a brush if necessary. Ensure the steel pressure rod spring is free of obstructions.
- **Mop Head Cleaning:** Detach the mop head from the pole. Machine wash or hand wash the mop head with appropriate detergent. Allow it to air dry completely before reattaching or storing to prevent mildew.
- **Caster Maintenance:** Check the casters regularly for hair, lint, or other debris that might impede their movement. Clean them as needed to maintain smooth mobility.

- **Storage:** Store the mop bucket system in a clean, dry area away from direct sunlight when not in use. The caution sign can be folded flat for compact storage.

Troubleshooting

Here are solutions to common issues you might encounter:

- **Wringer not extracting water effectively:**
  - Check for debris or obstructions in the wringer mechanism.
  - Ensure the mop head is properly positioned within the wringer basket.
  - Verify that the wringer is securely attached to the bucket.
- **Mop bucket wheels not rolling smoothly:**
  - Inspect casters for accumulated hair, lint, or dirt. Clean them thoroughly.
  - Ensure casters are properly seated and not damaged.
- **Mop head detaching from pole:**
  - Tighten the mop head securely onto the threaded pole.
  - Inspect the threads on both the mop head and pole for wear or damage.

Specifications

Feature	Detail
Brand	SIMPLI-MAGIC
Model Number	79651
Capacity	35 Quarts
Color	Yellow Bucket
Material	Polyethylene (PE)
Mounting Type	Floor Standing
Item Weight	15 Pounds
Included Components	Commercial Mop Bucket on Wheels, 35 Quart, Yellow, Including Wet Floor Caution Sign and Mop Set
