Garvee Large Metal Chicken Coop Instruction Manual

Model: ZYFPHO_12VJ0WEB-CA9bk
Brand: Garvee

Introduction

Thank you for choosing the Garvee Large Metal Chicken Coop. This manual provides essential information for the safe assembly, operation, and maintenance of your new poultry run. Designed for durability and animal welfare, this coop features a galvanized anti-rust steel frame, a UV- and water-proof spire roof, and a PVC-coated hex mesh for predator protection. Please read these instructions carefully before beginning assembly and retain them for future reference.

Safety Information

- Always wear appropriate safety gear, including gloves, during assembly to prevent cuts or pinches.
- Ensure the assembly area is clear of obstructions and children.
- This product requires two adults for safe and efficient assembly.
- Securely anchor the coop to the ground using the provided sleeve anchors to prevent wind damage or tipping.
- Regularly inspect the coop for any loose parts, sharp edges, or damage that could harm animals or users.
- Do not allow children to climb on or play inside the coop unsupervised.

Package Contents

Before beginning assembly, verify that all components are present and undamaged. Refer to the packing list included

with your product for a complete inventory. Key components include:

- Galvanized steel tubes (color-coded for easy identification)
- PVC-coated hexagonal mesh panels (pre-hung)
- 210D Oxford UV- & Water-Proof Cover
- Stainless steel bolts and fasteners
- Wrench and sleeve anchors
- Door assembly with dual lockable doors

Setup and Assembly Instructions

The Garvee Large Metal Chicken Coop is designed for a two-person, tool-free build, typically completed in under 120 minutes. Follow these steps for proper assembly:

1. **Prepare the Site:** Choose a level, well-drained area for the coop. Clear any debris or sharp objects.
2. **Assemble the Frame:** Connect the color-coded galvanized steel tubes according to the diagram in your included manual. Ensure all connections are strong and secure using the stainless steel bolts.
3. **Attach Mesh Panels:** The PVC-coated hexagonal mesh panels are pre-hung. Attach them to the frame, ensuring they are taut and securely fastened to create a bite-proof barrier.
4. **Install the Roof Structure:** Assemble the spire roof frame, utilizing the click-in ridge beam for stability.
5. **Apply the Cover:** Drape the 210D Oxford UV- & Water-Proof Cover over the spire roof. Secure it firmly using the strong straps and grommets provided. Ensure the cover is properly aligned to allow for instant rain run-off.
6. **Install Doors:** Attach the dual lockable doors to the designated frame section. Test the locking mechanism for smooth operation.
7. **Anchor the Coop:** Use the provided sleeve anchors to secure the ground-level skirt stakes to the ground. This prevents predators from digging under and enhances stability against strong winds.

Operating Instructions

This multi-pet manor provides a secure and spacious environment for various animals. The 9.8 × 19.7 ft footprint can house approximately 30 chickens, 8 ducks, 20 rabbits, or a pair of goat kids.

- **Animal Introduction:** Introduce animals gradually to their new environment. Ensure they have access to food, water, and appropriate shelter within the coop.
- **Security:** Always ensure the dual lockable doors are securely latched to prevent escape and protect against predators.
- **Ventilation:** The 1-inch hexagonal mesh provides 360° fresh-air ventilation, crucial for animal health.
- **Weather Protection:** The 210D Oxford spire roof offers UV50+ protection and is waterproof, shielding animals from sun and rain.
- **Customization:** The coop features pre-drilled holes for adding accessories such as roosting bars or nesting boxes (not included).

Maintenance

Regular maintenance ensures the longevity and safety of your Garvee Chicken Coop.

- **Cleaning:** Periodically clean the interior of the coop to maintain hygiene for your animals. The galvanized steel frame and PVC-coated mesh are easy to wipe down.
- **Cover Care:** The 210D Oxford cover is UV50+ and waterproof. Clean it with mild soap and water as needed. Avoid harsh chemicals that could degrade the material. Ensure it remains securely fastened, especially during high winds.
- **Frame Inspection:** Annually check all steel tube connections and bolts for tightness. Re-tighten if necessary. Inspect the galvanized coating for any signs of damage or rust, though the hot-dipped galvanization provides a lifetime anti-rust guarantee.
- **Mesh Inspection:** Regularly check the PVC-coated hex mesh for any tears, holes, or weak points that could compromise predator protection. Repair or replace damaged sections promptly.
- **Ground Anchors:** Verify that the sleeve anchors and ground-level skirt stakes remain firmly in place, especially after severe weather.

Troubleshooting

This section addresses common issues you might encounter with your chicken coop.

- **Coop feels unstable:** Ensure all frame connections are tightly bolted. Verify that the ground is level and all sleeve anchors are fully engaged. Re-check the ground-level skirt stakes.
- **Water pooling on roof:** The spire roof is designed for instant run-off. Ensure the cover is taut and correctly aligned, with no sags where water could collect. Check for any obstructions on the roof.
- **Predator concerns:** Double-check all mesh panel attachments and door latches. Ensure the ground-level skirt stakes are fully buried and secured to deter digging predators. Inspect the mesh for any damage.
- **Difficulty with door operation:** Check for any debris obstructing the door track or hinges. Ensure the frame is square and not twisted, which could misalign the door. Lubricate hinges if necessary.

Specifications

Feature	Detail
Model Number	ZYFPHO_12VJ0WEB-CA9bk
Dimensions (L x W x H)	5.88L x 3.05W x 1.98H Meters (9.8' W x 19.7' L x 6.6' H)
Material	Hot-dipped Galvanized Steel Frame, PVC-Coated Hex Mesh
Roof Material	210D Oxford Cloth (UV50+, Waterproof)
Mesh Size	1 inch hexagonal mesh, 0.7 mm wire
Wind Rating	1,500 lb (frame), stable in 60 mph storms
Mesh Burst Strength	1,200 lb
Assembly Time	Approx. 120 minutes (two adults)
Capacity	Up to 30 chickens, 8 ducks, 20 rabbits, or 2 goat kids
Special Features	Spire Roof, Dual Lockable Doors, Ground-level Skirt Stakes, Pre-drilled holes for add-ons
