GarveeTech css7eo

GarveeTech Large Litter Robot Box Enclosure Cabinet Instruction Manual

Model: css7eo | Brand: GarveeTech

Introduction

This manual provides comprehensive instructions for the assembly, operation, and maintenance of your GarveeTech Large Litter Robot Box Enclosure Cabinet. Designed to accommodate most self-cleaning litter boxes, including Litter Robot 3 and 4, this enclosure offers a discreet and functional solution for managing your cat's litter area. It features a dog-proof shelf, integrated power outlets, and a litter containment system to enhance cleanliness and convenience.

Please read these instructions carefully before assembly and use to ensure proper function and safety.

Safety Information

- Always follow all assembly instructions carefully.
- Do not overload the top surface or shelves of the cabinet. The maximum weight capacity for the top surface is 150 lbs.
- Ensure all electrical connections are secure and the power cord is not pinched or damaged.
- Keep children and pets away from small parts during assembly.
- Place the cabinet on a flat, stable surface to prevent tipping.
- Do not expose the electrical components to water or excessive moisture.

Package Contents

Before beginning assembly, verify that all parts are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Cabinet Panels (various sizes)
- Hardware Pack (screws, dowels, cam locks, etc.)
- Integrated Power Outlet Unit with 5ft Power Cord

- Removable Litter Tracking Mat
- Instruction Manual

Note: Specific quantities of panels and hardware may vary. Refer to the detailed parts list included in your physical instruction manual.

Assembly and Setup

Assembly typically requires two people. Follow the step-by-step diagrams provided in your physical instruction manual for detailed guidance.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches.
2. **Assemble Frame:** Connect the side panels, bottom panel, and back panel using the provided hardware. Ensure all connections are tight and secure.
3. **Install Interior Shelf:** Insert the dog-proof barrier shelf into its designated slots. This shelf helps prevent larger pets from accessing the litter area.
4. **Attach Doors:** Secure the cabinet doors using the hinges and screws. Adjust as necessary for proper alignment.
5. **Install Power Outlet:** Mount the integrated power outlet unit into the pre-drilled opening on the cabinet. Route the 5ft power cord out the back of the unit.
6. **Place Litter Tracking Mat:** Position the removable litter tracking mat at the entrance of the litter compartment.
7. **Position Litter Box:** Carefully place your self-cleaning litter box (e.g., Litter Robot 3 or 4) inside the main compartment. Ensure there is adequate space for its operation and access for your cat.
8. **Connect Power:** Plug the cabinet's power cord into a standard wall outlet. Then, plug your litter robot and any other devices into the integrated AC outlets or USB ports.

Image: Overview of the GarveeTech Litter Robot Enclosure with key dimensions highlighted. The internal dimensions are 27.75"L x 24.8"W x 30.3"H, designed to fit large automatic litter boxes. The overall cabinet dimensions are approximately 39.4"L x 26"W x 32.9"H.

Operating Instructions

- **Litter Box Placement:** Ensure your automatic litter box is correctly positioned within the enclosure, allowing for proper cycling and waste disposal.
- **Dog-Proof Shelf:** The integrated barrier shelf is designed to restrict access for larger pets, providing a private space for your cat. Ensure it is securely in place.
- **Power Outlets:** Use the two AC outlets and two USB ports to power your litter robot, charge pet gadgets, or other small electronic devices. The 5ft power cord provides flexibility for placement.
- **Litter Tracking Mat:** The mat at the entrance helps capture loose litter from your cat's paws, contributing to a cleaner surrounding area.
- **Access:** The cabinet doors provide easy access for cleaning, refilling litter, or servicing your litter robot.

Maintenance

- **Cleaning the Cabinet:** Wipe down the exterior and interior surfaces of the cabinet with a damp cloth and mild detergent as needed. Avoid abrasive cleaners that may damage the finish.
- **Cleaning the Tracking Mat:** The removable tracking mat can be easily lifted out for cleaning. Shake off loose litter, vacuum, or rinse with water and allow to dry completely before replacing.
- **Dusting:** Regularly dust the cabinet and power outlet area to prevent dust buildup.
- **Power Outlet Care:** Ensure the power outlets and USB ports are free from debris. Do not attempt to clean them with liquids while plugged in.

Troubleshooting

Problem	Possible Cause	Solution
Litter tracking outside the enclosure	Mat is dirty or misplaced; cat is jumping over mat.	Clean or reposition the tracking mat. Ensure the mat covers the exit path effectively.

Problem	Possible Cause	Solution
Power outlets not working	Cabinet power cord unplugged; device not properly plugged in; circuit breaker tripped.	Check if the cabinet's main power cord is securely plugged into the wall. Ensure devices are fully inserted into the outlets. Check your home's circuit breaker.
Cabinet doors do not close properly	Hinges are loose or misaligned; obstruction.	Tighten hinge screws or adjust hinge alignment. Remove any obstructions.
Dog accessing litter box	Dog-proof shelf not installed or incorrectly positioned.	Ensure the dog-proof barrier shelf is correctly installed and secured to block access.
