Read these instructions carefully and retain them for future use. If this product is passed to a third party,

then these instructions must be included.

When using the product, basic safety precautions should always be followed to reduce the risk of injury including the following:

Risk of suffocation!

Keep any packaging materials away from children and pets — these materials are a potential source of danger, e.. suffocation.

Never touch the blade with bare hands. Wearprotective gloves during use.

- This product is intended for cutting stems, vines and branches of plants. Do not use the product aside from its intended use.
- Before use, check the blades and preset cutting positions of the product are working properly.
- Do not pick up or grasp the product by the blades. Always use the handles when holding the product.
- When using the product to cut plants, be alert for any debris that snaps or springs back to avoid any injury.
- Do not let children play with this product.
- Do not use this product if any parts are missing, damaged or worn.
- Do not use the product above shoulder height to avoid potential injury.
- Do not modify or alter the product.
- Regularly examine the product for wear and tear. Stop using the product at first sign of damage o if parts become detached.
- In case of emergency, apply first aid on wound or cuts.
 - Clean the wound with clean running water and mild soap.
 - Apply antibiotic and cover with bandage.

Cutting performance/tips

- Always cut plants at a 45° angle and away from the bud (Fig. 5, 6). This helps to achieve cleaner cuts, helps the plant heal faster and prevents water build up.
- · Always cut one part of the plant at a time.
- When cutting, position the plant to the deepest part of the blade. it is best to prune flowering plants after flowering season.
- Prune trees with heavy sap flow during summer to avoid heavy bleeding

Cleaning

- Clean the product after every use.
- Toremove any sticky substance like plant sap from the blades, use a steel ool to brush the blades.
- 7o clean the handles, wipe the product with a soft, slightly damp cloth.
- Keep the product clean of clippings or any materials from cutting. They may lodge between the blades and the hinge of the product.

Maintenance

• Sharpen the blades of the product regularly using a diamond file. The blades have a beveled edge that needs to be sharpened at an angle of 23"

- ~ Make sure the product s dry.
- ~ Hold the product at the correct angle.
- Usea circular motion to sharpen the beveled edge of the blade.
- ~ Make sure to sharpen both sides of the blade evenly.
- > Apply lubricant to the blades, joints and spring mechanism of the product regularly to prevent rusting.

Storage

- Make sure that the safety lock is engaged before storing.
- Storeina cooland dry place away from children and pets, ideally in original packaging.

Disposal

Dispose of the product according to local regulations. If in doubt, consult your local authorities.
