Here are some frequently asked questions about L357 voice recorder

1. **How to record and playback recording?**

   First, please turn on voice recorder, simply push the power button (at left side) to "ON"position, the recorder will boot up. Press REC button to start a new recording. Press "STOP" button to save the recording after we finished recording. Press "PLAY" button to play the recording file, press the "Play" again to pause playing.

2. **How to fast forward/rewind when playback**

   At playback mode, please long press the UP/DOWN button to fast forward or rewind.

3. How to Adjust VOL+/VOL- ? In the playback state, short press the VOL button (don't long press VOL key), and the upper right of the screen will display the current volume value.

4. **How to Turn ON Voice Activated Function**

   Go to Recorder menu, find Record Settings, enter it -> Voice Activation Mode-> Voice Activation Switch -> AVR ON-> Press M button to Confirm. Then press the "REC" button to start recording, you will see the VOR label 15 appear next to the battery icon at the top right of the screen,it means you have successfully turn on voice activated recording function, press the STOP button to save recording.

   When AVR mode is ON, the recorder will enter voice activated recording mode, recorder can set voice decibels at 7 different levels , level 7 is the most sensitivity.

5. **The voice recorder can connect to a computer,but only charging not read the disk.**

   I supposed that failed to connect may caused by the following:

   A) Firstly, please make sure you are using the included

   Type-C USB cable, as other Type-C USB cables may not be compatible. If you have tried to use the supplied Type-C USB cable and are still having problems, it may be broken or the USB socket is loose. so,please change another USB cable to try(like your android phone cable) or connect by another USB socket, or simply reboot your computer

   B) Please check if the recorder switch OFF when connecting with computer.

   C) Maybe something wrong with the device, if it is a quality problem, we can provide replacement during the warranty period.

6. **) The recording from the recorder cannot be played on the computer.**

   It seems that there is something wrong with the media player. Please use another media player to have a try,

   1. For Mac user, please download the free VLC Media Player to playback the recordings. (**Website: http://www.videolan.org/**)

   2. For Windows user, please download the free VLC Media Player, or just choose"Windows Media Player"

to playback.

7. **Memory is full**

   The voice recorder has a limited storage ,when space is full, you can connect it to your computer and back up all the files, then delete all the recordings .

8. **How to Fix Disk Errors**

   Disk error usually caused by following:

   1. static shock, like over current charging
   2. cut off its power before device formatting finished We suggest you format the device on Windows if you can.Format the device in MAC should be strict accordance with the instruction.

      How to Rescue:

      Step 1, Turn off the device, connect it with computer

      Step 2, Backup all files to your computer and then format the recorder disk.

      We made a quick video for your reference **https://youtu.be/n2OI_hfq_ac** L357 How to Format on MAC Computer **https://youtu.be/HQBzLXAyZFc** L357 How to Format on WIN Computer

If you have tried the above methods but still can not solve the problem of disk error, please feel free to contact our after sales mailbox, we will provide you with further solutions.

Warranty Statement:

The warranty period is within one year from the date of purchase. During the warranty period, if the product fails due to normal use according to the user manual and attached label, the user can receive free repair services.
