Ensure all connections are secure before proceeding. The hydraulic mechanism should be installed according to the detailed diagrams in your manual.

Operating the Lift-Up Storage

The bed frame features an effortless hydraulic lift system for accessing the spacious under-bed storage. A built-in dust-proof cover helps keep your stored items clean and organized.

To Open the Storage:

1. Locate the fabric pull handle at the foot of the bed.
2. Gently pull the handle upwards. The hydraulic system will assist in lifting the mattress platform smoothly.
3. The platform will stay securely in the open position, providing full access to the storage compartment.

To Close the Storage:

1. Ensure all items are placed within the storage area and no obstructions are present.
2. Gently push the mattress platform downwards until it fully closes. The hydraulic system will provide controlled descent.
3. Confirm the platform is fully lowered and secured.

Care and Maintenance

Proper care will ensure the longevity and appearance of your Garvee bed frame.

Velvet Upholstery Care:

- Regularly vacuum with a soft brush attachment to remove dust and debris.
- For spills, blot immediately with a clean, dry cloth. Do not rub.
- For deeper cleaning, consult a professional upholstery cleaner or use a velvet-safe cleaning product following its instructions.
- Avoid direct sunlight to prevent fading.

Metal Frame and Hydraulic System Care:

- Wipe metal surfaces with a soft, damp cloth. Avoid abrasive cleaners.
- Periodically check all bolts and screws to ensure they are tight. Retighten if necessary.
- Inspect the hydraulic system for any signs of wear or damage. If issues are detected, contact customer support.

Troubleshooting

If you encounter any issues with your bed frame, refer to the following common solutions:

Squeaking Noises:

- Ensure all assembly bolts are securely tightened.
- Check that the wooden slats are properly seated in their holders.
- The bed frame is equipped with EVA noise-absorbing pads to minimize noise. Verify these are correctly positioned.

Difficulty Lifting/Lowering Mechanism:

- Ensure the bed frame is not overloaded beyond its 1,000 lbs capacity.
- Verify that the hydraulic pistons are correctly installed and not obstructed.
- If the mechanism feels stiff, ensure it has been used a few times to break in.
