Amazon Echo Sub

QUICK START GUIDE

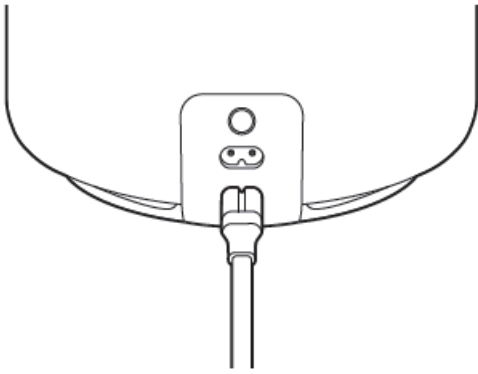

Getting to know your Echo Sub

Also included: Power cord

1. Plug in your Echo Sub

Please set up your compatible Echo speakers before plugging in your Echo Sub. Plug the power cord into your Echo Sub and then into a power outlet. The LED will light up letting you know that your Echo Sub is ready for setup in the Alexa App.

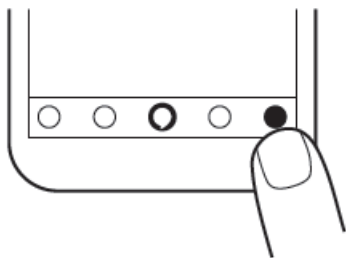

You must use the power cord included in your original Echo Sub package for optimal performance.

2. Download the Alexa App

Download the latest version of the Alexa App from the app store.

The app helps you get more out of your Echo Sub. It is where you pair your Echo Sub to compatible Echo device(s).

If the setup process does not automatically start, tap the Devices icon in the lower right of the Alexa App.

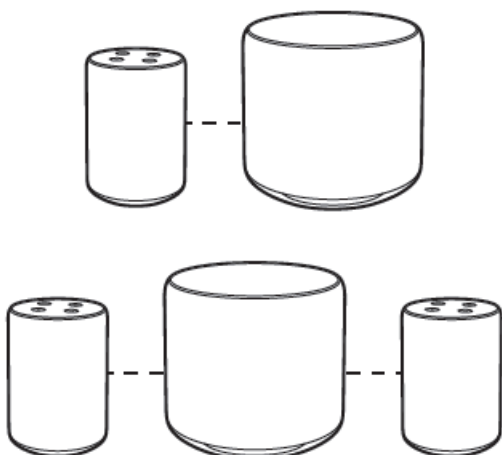

To learn more about your Echo Sub, go to Help & Feedback in the Alexa App.

3. Configure your Echo Sub

Connect your Echo Sub to 1 or 2 identical compatible Echo device(s).

Pair your Echo Sub with your Echo device(s) by going to Alexa Devices > Echo Sub > Speaker Pairing.

Getting started with your Echo Sub

Where to put your Echo Sub

Echo Sub should be placed on the floor in the same room as the Echo device(s) it is paired with.

Give us your feedback

Alexa will improve over time, with new features and ways to get things done. We want to hear about your experiences. Use the Alexa App to send us feedback or visit www.amazon.com/devicesupport.
