Redragon M925 PRO

Redragon M925 PRO Wireless Gaming Mouse User Manual

Model: M925 PRO

Introduction

This manual provides detailed instructions for the Redragon M925 PRO Wireless Gaming Mouse. Please read this manual thoroughly before using the product to ensure proper operation and to maximize its features.

Setup

1. Connectivity Modes

The M925 PRO mouse supports three connection modes: Bluetooth (BT), 2.4GHz wireless via USB receiver, and wired via USB-C cable.

- **2.4GHz Wireless:** Insert the 2.4GHz USB receiver into an available USB port on your computer. The mouse will automatically connect. The receiver is typically stored in a slot on the bottom of the mouse.
- **Bluetooth (BT):** Activate Bluetooth on your computer. Put the mouse into Bluetooth pairing mode (refer to the mouse's specific button combination for pairing, usually a button on the bottom or side). Select "Redragon M925 PRO" from your computer's Bluetooth device list to pair.
- **Wired (USB-C):** Connect the provided USB-C cable from the mouse to a USB port on your computer. The mouse will function as a wired device and charge simultaneously.

2. Software Installation

For full customization of buttons, DPI settings, polling rate, and RGB lighting, download and install the official Redragon M925 PRO driver software from the Redragon website.

- Visit the official Redragon support page.
- Locate the M925 PRO model and download the appropriate driver software for your operating system (PC/Mac/Linux/Unix).
- Follow the on-screen instructions to complete the installation. Ensure you download the 'wireless' version of the software even if primarily using a wired connection, as noted by user feedback.

Operating Instructions

1. DPI Adjustment

The mouse features 5 adjustable DPI levels: 400, 800, 1600, 2400, and 3200. You can switch between these levels using the dedicated DPI button, usually located near the scroll wheel. The scroll wheel LED will display different colors to indicate the current DPI level.

- Press the DPI button to cycle through the preset DPI levels.
- For advanced customization and to expand DPI up to 26,000, use the driver software.

2. Polling Rate Adjustment

Adjust the polling rate for optimized responsiveness. Available polling rates are 125Hz, 250Hz, 500Hz, and 1000Hz.

- Use the driver software to select your desired polling rate. Higher rates provide faster signal transmission.

3. Programmable Buttons & Custom RGB Lighting

The M925 PRO features 10 programmable buttons and customizable RGB lighting.

- **Button Remapping:** Use the driver software to remap any of the 10 buttons to perform specific functions, macros, or keybinds.
- **RGB Lighting:** Personalize the RGB lighting effects (breathing, static, neon, flow modes) through the driver software. Lighting can also be turned off.

4. Power Management

The mouse is equipped with a 1000mAh battery and advanced low-power chip (PAW3395 sensor) for extended battery life.

- **Smart Power Saving:** The mouse features multi-level power-saving modes and automatically enters sleep mode after 3 minutes of inactivity to conserve battery.
- **Low Battery Indicator:** When the battery power is low, the scroll wheel LED will flash red as a reminder to recharge.
- **Charging:** Connect the mouse via the USB-C cable to charge the internal battery.

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the mouse. For stubborn dirt, a slightly damp cloth can be used, ensuring no moisture enters the device. Avoid harsh chemicals or abrasive materials.
- **Storage:** Store the mouse in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the mouse frequently. Charge it when the low battery indicator appears.

Troubleshooting

Mouse Not Responding

- **Check Battery:** Ensure the mouse is charged. Connect it via USB-C cable to see if it powers on.

- **Check Connection:**
  - *2.4GHz:* Ensure the USB receiver is securely plugged into a working USB port. Try a different USB port.
  - *Bluetooth:* Verify Bluetooth is enabled on your computer and the mouse is paired. Try re-pairing the device.
  - *Wired:* Ensure the USB-C cable is securely connected to both the mouse and the computer.
- **Restart:** Restart your computer and the mouse (if it has a power switch).

Software Not Recognizing Mouse

- **Correct Software Version:** Ensure you have downloaded and installed the correct 'wireless' version of the driver software for the M925 PRO.
- **Connection Mode:** The software typically works best when connected via 2.4GHz wireless or wired USB. Bluetooth connection might not be fully supported by the software for customization.
- **Reinstallation:** Try uninstalling and reinstalling the driver software.

DPI/RGB Settings Not Changing

- **Software Application:** Ensure any changes made in the driver software are applied or saved.
- **Firmware Update:** Check the Redragon website for any available firmware updates for the M925 PRO mouse.

Specifications

Brand	Redragon
Model	M925 PRO
Connectivity Technology	Bluetooth (BT), 2.4GHz Wireless, USB-C Wired
Movement Detection Technology	Optical (PAW3395 Sensor)
DPI Levels	400/800/1600/2400/3200 (Expandable up to 26,000 via software)
Polling Rate	125Hz, 250Hz, 500Hz, 1000Hz
Buttons	10 Programmable Buttons
