Install OBDwiz software

Point your browser to obdlink.com/software

Download “OBDwiz for Windows”. Run the installer to set up the software.

Connect OBDLink SX to the PC

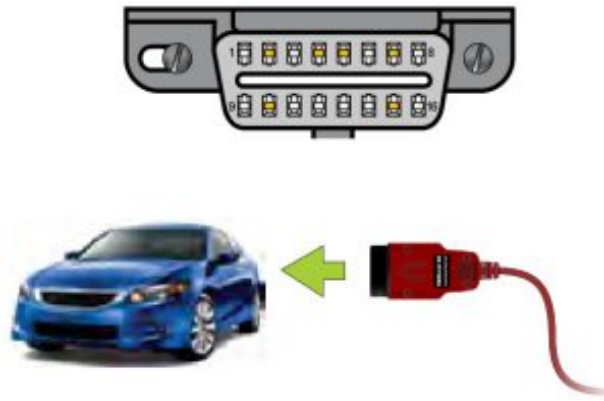

The LED will turn yellow when you connect OBDLink SX to the PC's USB port.

— Red LED? Drivers were not installed properly.

Plug OBDLink SX into the OBD port

The OBD port is usually found on the driver's side, under the dash.

Turn ignition to Key On, Engine Off

The LED will turn green.

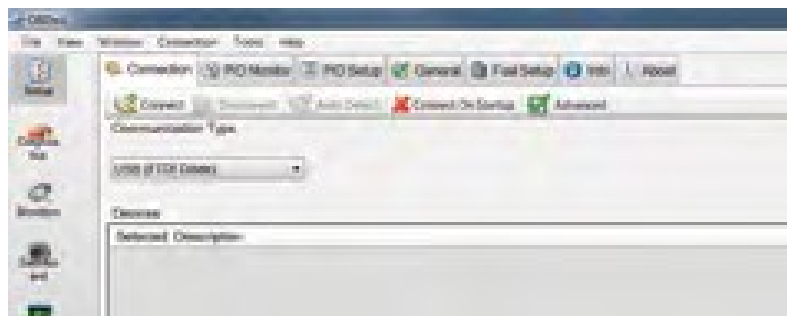

Vehicles with push button start: press the button without stepping on the brake pedal.
— Yellow LED? Check for blown fuses.
(OBD port, auxiliary port, and the cigarette lighter).

Launch OBDwiz software

Click Start > Programs > OBDwiz > OBDwiz.

Activate OBDwiz

Click the 'Connect' button:

Follow the prompts to activate the software and begin using your OBDLink SX.
