## Before First Use

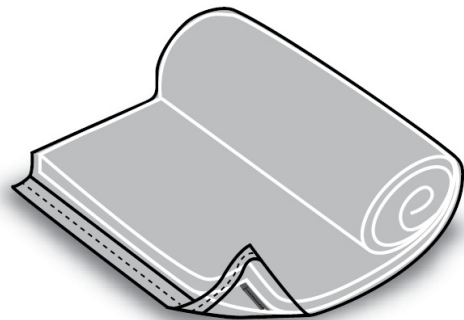

**Check for transport damages.**

**Step 1 :** Lay the packaged mattress on top of the bed and carefully cut the containment sleeve. To prevent damaging the mattress, do not use a knife or cutter.

**1**

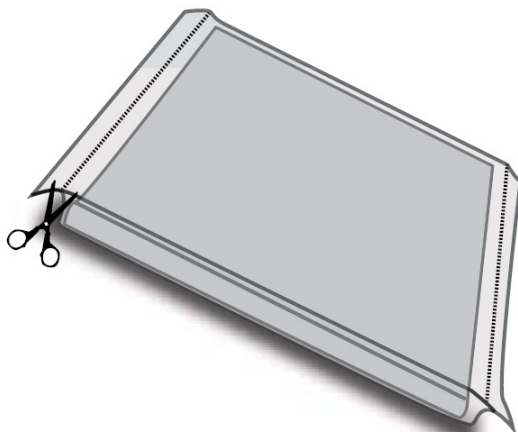

**2**

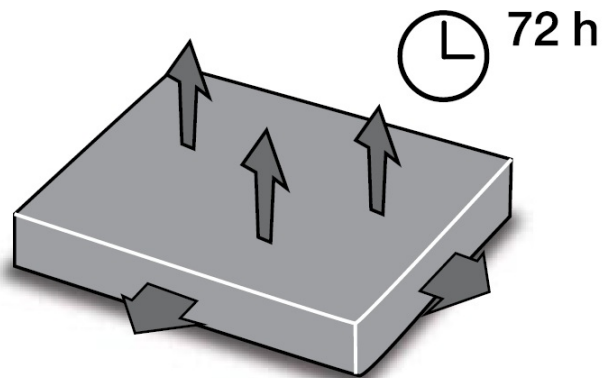

**Step 2:** Unroll the mattress onto your bed. Gently remove and discard the protective fabric liner.

**3**

**4**

**Step 3:** The mattress may take up to 72 hours to expand to its original shape/height, but you may sleep on it

during this time.

TIPS:

- You can use your mattress as soon as it has expanded, but note that it may take up to 72 hours for the mattress to reach its maximum height.
- As each mattress may spend a different amount of time under compression, there may be slight variances to the product’s dimensions. These should not affect the quality of the mattress or its usability.
- The mattress is compressed and packaged right off the line, so you may notice a faint odor when you open the packaging. This should release over time. Waiting to put bedsheets on the mattress topper will facilitate odor release.
- As memory foam ages, it may change color slightly due to natural oxidation. This is completely normal and does not indicate a problem or a loss of comfort or performance.
