Installation Drive Tech

Input Voltage	VAC120
Output Voltage	(Label Check (VDC24 / 1
Ambient Temp	F104° + – F-86° / C° 40 + – C° –
Environment	Damp and

Important Notes

Please Read Before Installation!

- The system is to be installed in accordance with the National Electrical Code or local code.
- The system is to be installed and serviced by a qualified licensed electrician.
- LED Driver must be grounded in accordance with the NEC or local codes.

Before You Begin

Determine the location of system parts:

1. Wall Switch
2. LED Driver

Note: Max distance between Wall Switch and LED Driver 100m30 ft.

To avoid fire shock or death turn the power off at circuit breaker and test to ensure the power is off before wiring.

Open wiring compartment

Punch knockouts for wiring conduit access

Mount the Driver

Select a support location weight which can provide adequate support for the weight of the LED Driver.

Note: Install the LED Driver in a well-ventilated area free from explosive gases and vapors.

A. Mount the wall bracket

B. Position LED Driver at an angle over the brackets latches

C. Place LED Driver on the bracket latches

D. Align LED Driver on the bracket

E. Install the supplied lock screw

Wire Connections

With the power switched off connect the wires according to the wiring diagram below.

Note: If you are connecting more than one wire to each terminal it is recommended to form a pigtail connection.
