OnePlus Buds 3

User Guide & Safety and Warranty

EN User Guide & Safety and Warranty

Specifications	This package contains the following accessories
OnePlus Buds 3 Charging Case Charging Cable (USB-A to USB-C) Silicone Ear Tips (XS/S/M/L) Quick Start Guide Safety and Warranty Information Tips for Better Sound Quality Sticker Tool for Removing Ear Tips Warranty Card	USB-A to USB-C Cable Quick Start Guide Safety and Warranty Information Sticker Tool for Removing Ear Tips

Pairing and Connecting
Ensure that your Bluetooth is turned on. Enable Bluetooth on the OnePlus mobile phone, open the charging case of the buds, and the charging case enters the pairing mode automatically.

Pairing Mode
Ensure that your Bluetooth is turned on. Enable Bluetooth on the OnePlus mobile phone. Press and hold the left or right earbud for 2 seconds. Your earbuds will enter the pairing mode. Your earbuds will automatically connect to your OnePlus mobile phone.

Tap and Hold Controls
Tap and hold the left or right earbud for 2 seconds to play or pause music, or to answer or end a call.

Gesture Settings
Gesture Service settings allow the buds to do this: Change volume with the touch sensor. Press and hold the touch sensor to switch between ANC, Transparency, and off.

Bass Boost
Bass Boost is a feature that can be turned on and off in the OnePlus Sound app. Bass Boost is only available when the buds are connected to a OnePlus device.

Replacing Ear Tips
Choose the ear tips that fit your ear to enjoy optimal comfort and bass consistent experience. Clean the silicone accessories on the ear tips or other parts.

V1.0.0

- The medical color is now already efficient.
- Improved Bluetooth connection stability.

Hearing Health and Measures Regarding Headphones
Prolonged exposure to high volume levels may cause hearing loss. To protect your hearing, we recommend you to avoid listening at maximum volume for prolonged periods. We also recommend you to follow the following guidelines when using headphones:
1. Use headphones at a reasonable volume for extended periods of time.
2. Do not change the listening volume frequently.
3. Do not increase the volume to block out noisy environments.
4. Lower the volume if you can still hear others around you.
5. Stop using the headphones if you experience ringing in your ears.

Play Control
Tap and hold the touch sensor on the charging case, double-tap and tap the touch sensor of the left earbud and right earbud to control the playback, answer/end/reject calls, and activate the voice assistant.

Voice Assistant
Tap and hold the touch sensor on the charging case, and the voice assistant will be activated.

Reset Control
Tap and hold the touch sensor on the charging case for 10 seconds, and the earbuds will be reset. Connect the earbuds to the OnePlus mobile phone and follow the prompts to complete the reset.

Charging the Buds
Charging Case
Place the buds into the charging case, the indicator shows the battery level of the earbuds.
Connect the charging cable to the charging case, the indicator shows the battery level of the charging case.

Cleaning
Use a soft, dry cloth to wipe the charging case, the earbuds and the ear tips. Do not use any cleaning agents or solvents.

Disposal
Dispose of the device, please hand and deliver the following considerations to ensure the best protection of the device and avoid dangerous or illegal situations.

Safety & Security Information
Please read the following information carefully before using the device and its accessories.
1. Please use the device according to the instructions in this manual, otherwise it may cause unexpected dangers.
2. Please use the device within the range of -10°-35°C (14°-95°F). Exceeds the high or low temperature may cause malfunction or danger.
3. Do not short-circuit the battery, disassemble, crush, or pierce the battery, or expose it to high temperatures or pressure, or dispose of it in fire, water, or other liquids, otherwise it may cause leakage, overheating, explosion, or fire.
4. Do not use, disassemble, modify, intentionally expose, or attempt to repair the battery, otherwise it may cause leakage, overheating, explosion, or fire.
5. Do not place the battery in a microwave oven, pressure cooker, or other high-temperature environments, otherwise it may cause explosion or fire.
6. The battery must be charged or discharged in accordance with the manufacturer's specifications, otherwise it may cause leakage, overheating, explosion, or fire.
7. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
8. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
9. If a battery leaks, please avoid contact with the leakage. If the leakage has accidentally contacted your skin, please immediately wash the affected area with clean water and seek medical advice.
10. If the battery is damaged, please immediately stop using it and contact the manufacturer or authorized service provider for inspection or replacement.
11. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
12. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
13. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
14. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
15. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
16. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
17. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
18. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
19. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
20. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
21. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
22. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
23. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
24. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
25. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
26. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
27. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
28. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
29. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
30. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
31. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
32. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
33. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
34. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
35. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
36. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
37. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
38. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
39. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
40. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
41. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
42. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
43. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
44. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
45. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
46. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
47. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
48. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
49. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
50. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
51. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
52. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
53. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
54. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
55. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
56. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
57. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
58. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
59. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
60. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
61. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
62. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
63. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
64. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
65. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
66. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
67. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
68. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
69. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
70. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
71. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
72. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
73. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
74. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
75. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
76. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
77. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
78. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
79. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
80. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
81. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
82. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
83. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
84. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
85. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
86. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
87. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
88. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
89. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
90. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
91. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
92. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
93. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
94. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
95. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
96. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
97. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
98. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
99. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.
100. Do not use the battery in environments with static electricity, otherwise it may cause damage to the battery.

Limited Warranty
1. Within the warranty period, if the product is caused by the design flaw or poor quality of the manufacturer, the manufacturer will provide free repair or replacement of the product or parts.
2. The following situations are not covered by the warranty:
- Please keep your Warranty Card and Proof of Purchase for future reference.
- Any damage caused by accidents, misuse, improper use, or use in unsuitable environments.
- Any damage caused by unauthorized modifications, disassembly, or repairs.
- Any damage caused by third-party accessories or products not approved by OnePlus.
- The warranty cannot be transferred.
- The warranty cannot be extended.
- Any damage caused by natural disasters, such as lightning, floods, fires, etc.
- Any damage caused by unauthorized use of the product for purposes other than its intended purpose.
- Any damage caused by improper storage, maintenance, or handling.
- Any damage caused by exceeding the product's specifications or limits.
- The warranty does not cover the battery's capacity degradation due to normal wear and tear.
- The warranty does not cover the battery's capacity degradation due to normal wear and tear.
