INSTRUCTIONS

### STEP-1 Check components and tools

Components (Kit Dependent):

- TP-UX
- Power Supply
- Connectors
- Client Speaker
- Client Mic
- Staff Combi Mic

Required Tools:

- Small flat bladed screwdriver
- Screws, fixings and tools for mounting (environment dependent)

Step-2 Position and wiring

Step-3 Adjust volume levels

- Ensure both Staff and Client dials are set to zero (fully counter-clockwise)
- Plug in the power supply and switch on
- Adjust the Staff control whilst someone talks on the client side, until the speaker is audible on the staff side
- Repeat the process in the other direction while adjusting the Client control
- If the volume is too quiet for the user or if there is feedback/ instability then increase or reduce the level controls as needed

For further optimization please download the installation guide from ampetronic.com or contact our friendly and knowledgeable team on +44 (0) 1636 610062 or email **support@ampetronic.com**.
