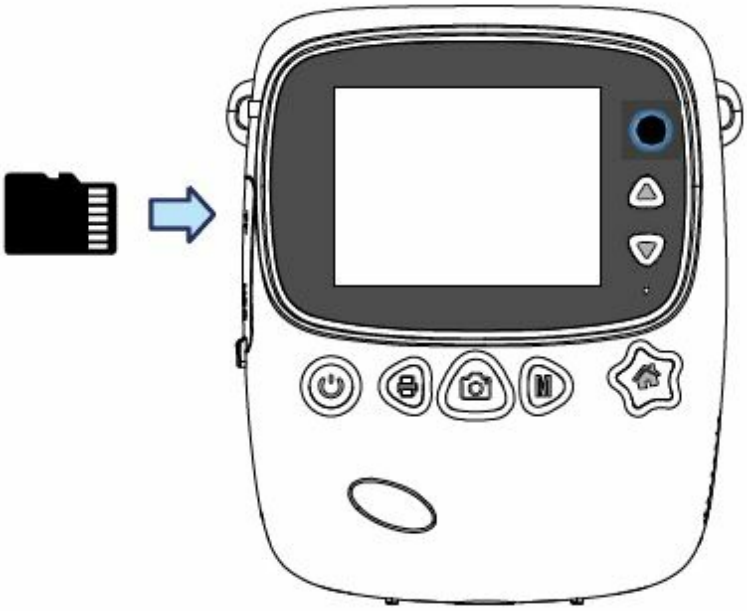
How to Use Your Camera

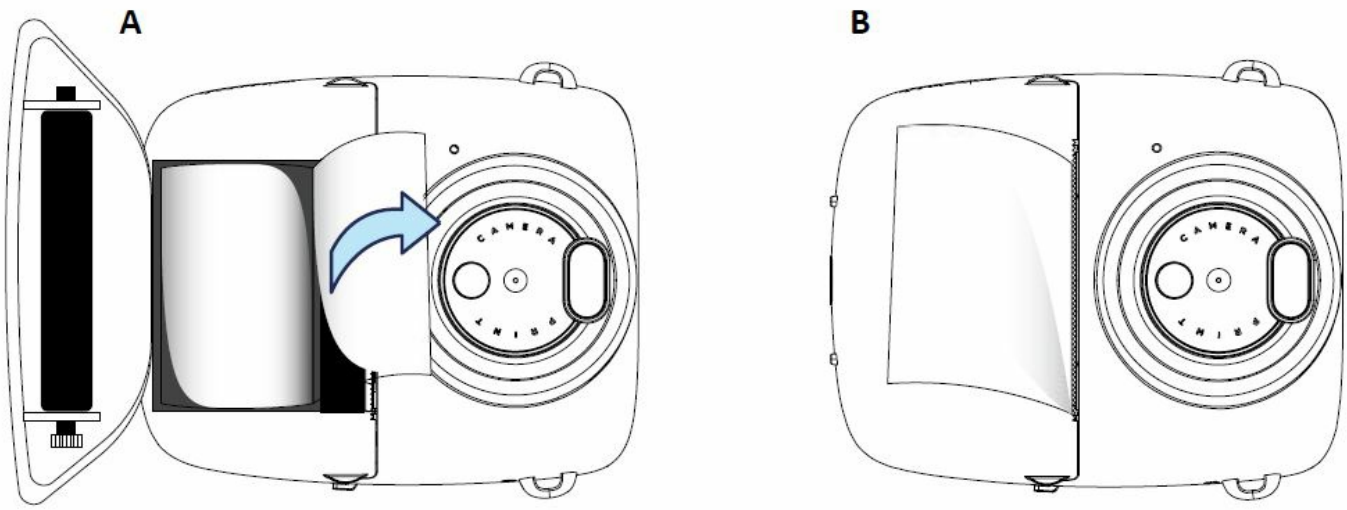
Installing and changing the microSD Card



- Put the microSD card backwards to the screen, insert to the card slot.
- Press the microSD card inward to take out the card.
- It is generally recommended to use a new microSD card or one that has been formatted prior to use. This helps improve compatibility with the camera.
- To format a microSD card, press Menu Button and choose Format in ❹ Camera Settings and select “Yes”. An alert “Format Completed” will appear on the screen when formatting is completed.

Please note: formatting will delete all pictures stored on the microSD card. If you do not want to delete pictures, please either download them to your computer or use a fresh card.

Installing and changing the Paper Roll



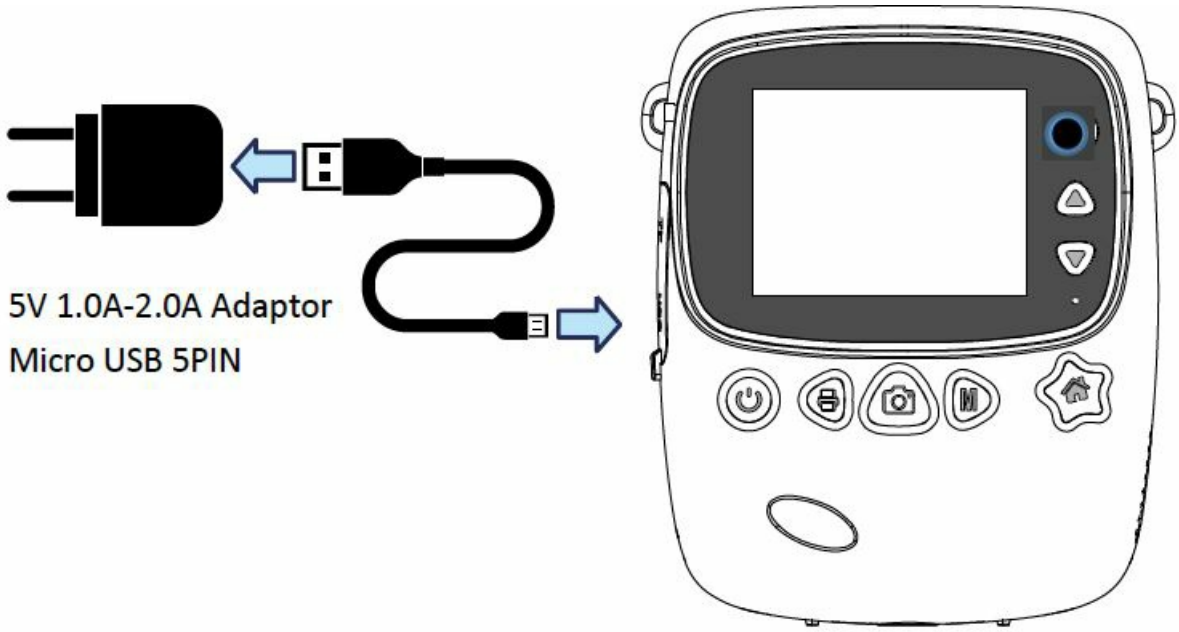
- Toggle the “Paper Roll Compartment Release Lever” upwards, the Paper Roll Compartment Cover will pop out.
- Install the Paper Roll as shown (A), with the loose end closest to the Lens. Allow a small amount of the paper to stick out so that it will feed into the system properly.
- Replace Paper Roll Compartment lid until it clicks into place (B)

Please note

- If the paper can be discharged normally during printing while nothing shows on the paper, please check whether the paper is placed in the correct direction.

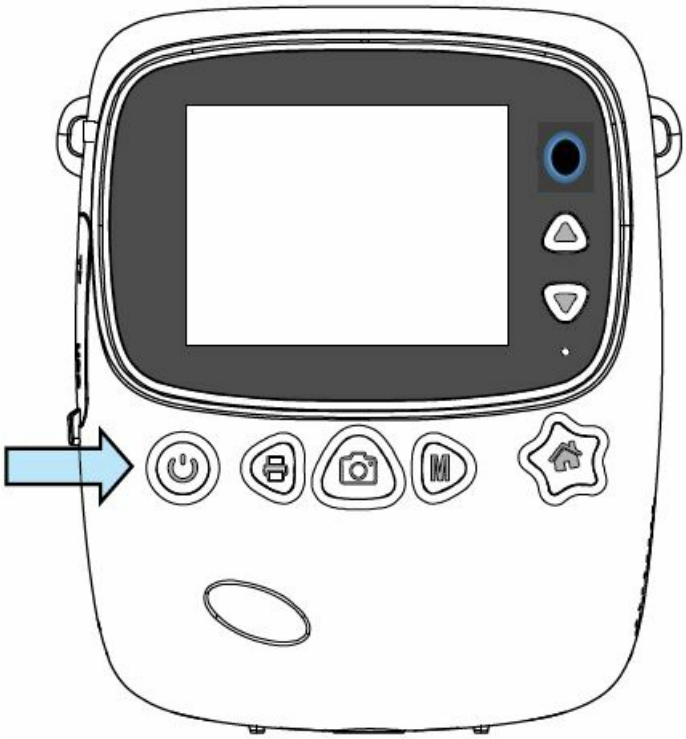
Charging And Power

Charging your camera



- Open the USB Port/microSD Card Cover.
- Connect a Mini USB Cable to the camera, then to a 5V 1A-2A wall charger.
- The camera will not print while charging.
- The Indicator Light will illuminatered during charging, and shut off once fully charged.

Turning your camera on and off



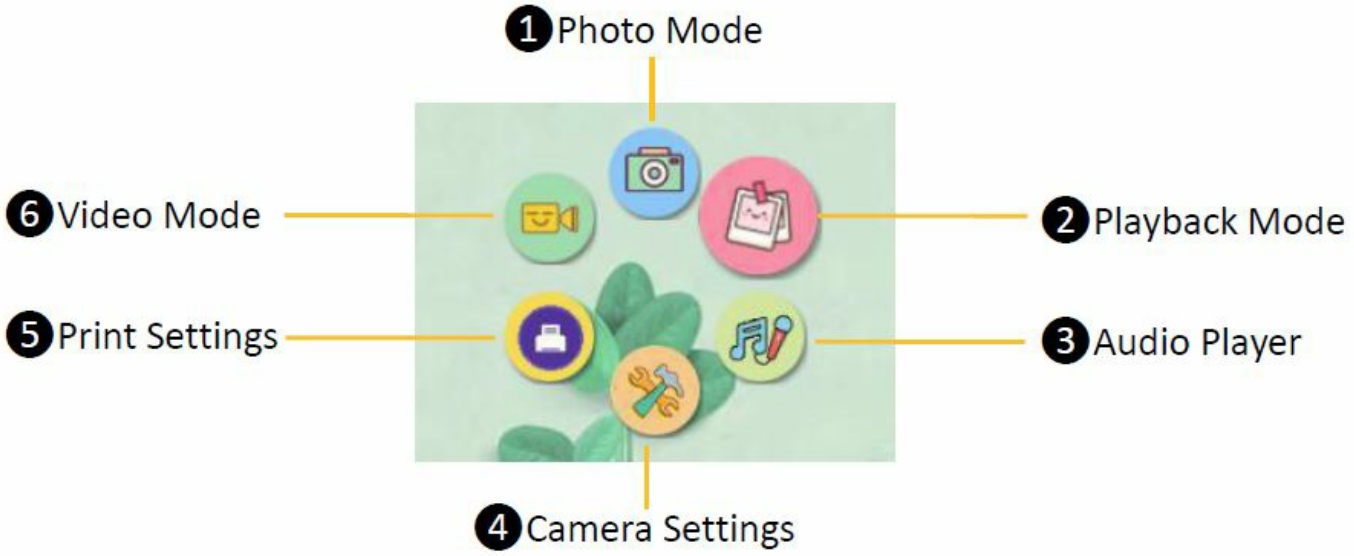
- Press and hold the Display Power Button. Indicator light will turn blue. Camera is turned on.
- Press and hold the Display Power Button again. Indicator light will turn off. Camera is turned off.
- Long press the “on/off button” to switch the front camera to take pictures.

Please note: If there is no operation within 5 minutes when camera stays turning on, the camera will automatically

turn off.

Buttons and Functions

Menu (Menu/ Back Button)



After camera is turned on, press Menu/Back Button to Main Menu, press Left Button or Right Button , Up Button or Down Button to switch between ❶Photo Mode, ❷Playback Mode, ❸Audio Player, ❹Camera Settings, ❺Print Settings, ❻Video Mode. Press Capture/Confirm Button to related modes or settings. Press Menu/Back Button again to return to main Menu. Please note: the camera defaults to the camera mode when it is turned on.
