Instructions

Depending on how you use the hub, choose the power supply option that's best for you.
(a) For both data transfer and charging: Connect the hub with both the power adapter and USB cable to ensure a stable connection. To achieve maximum data transfer rates, your computer system, peripherals, cables, and software must all support USB 3.0.
(b) For charging only: Connect the hub with the power adapter only. The hub will serve as a standalone charger featuring 3 full-speed PowerIQ™ charging ports.

Usage Tips

• For optimal performance, connected devices should not exceed a combined current of 10A (power adapter attached) otherwise, connections may become unstable or disconnect entirely.
For reference, the devices below are often rated as follows:

Mouse	100mA
Camera	>300mA
Portable hard disk	max. 500mA
USB 3.0 portable hard disk	max. 900mA
Keyboard	max. 500mA

• 2.4GHz wireless devices, MIDI devices, and some USB 3.0 devices may not be supported. Try using the host port or a USB 2.0 connection.

ATTENTION

1. Do not tamper with this product or expose it to excessive heat, humidity, or direct sunlight.
2. We are not responsible for any damage to drives or hard disk data caused by improper use and/or disassembly. Please use this product according to its instructions.
