 Anlmz CW350 3-in-1 Wireless Charging Station

Launch Date: November 8, 2022
Price: $29.99

Introduction

With the Anlmz CW350 3-in-1 Wireless Charging Station, you can now charge more than one device at the same time. It has a sleek design and works with all devices. It can charge smartphones, tablets, and earbuds at the same time, which makes it more convenient and less cluttered. The Anlmz CW350 is made of high-quality ABS plastic and has advanced safety features like overheat protection and temperature control to make sure it works well and is reliable. It works with Apple, Samsung, and Qi-enabled devices and gives each one the best power for it. The ability to charge quickly and the soft LED lights make it easier to use, making it perfect for use at home or on the go. Its non-slip rubber surface keeps it stable, and the built-in cable management design keeps lines from getting tangled. The Anlmz CW350 is the perfect charging option for modern people who are always on the go. It's small, durable, and easy to use.

Specifications

- **Brand**: Anlmz
- **Model Number**: CW350
- **Connectivity Technology**: Wireless & USB-C
- **Output Power**:
    - Smartphones: 10W
    - Earbuds: 5W

- Smartwatches: 3W
- **Charging Compatibility**:
    - Smartphones: All iPhones (from iPhone 8 to iPhone 16 Pro Max)
    - Smartwatches: Apple Watch Series 2 to 9 (excluding Series 10) & Ultra 1/2
    - Earbuds: AirPods Pro/Pro2/3/4 (with wireless charging cases)
- **Input Voltage**: 9V/2A or 12V/1.5A
- **Material**: ABS plastic and silicone
- **Dimensions**:
    - Product: 5.12 x 3.94 x 0.79 inches
    - Packaging: 3.86 x 3.86 x 5.04 inches
- **Weight**:
    - Product: 6.35 ounces
    - Packaging: 8.1 ounces
- **Color**: Black
- **Special Features**:
    - Fast charging
    - Wireless charging
    - Travel-friendly
    - Lightweight
    - 3-in-1 charging design for Apple devices

Package Includes

- 1 x Anlmz CW350 3-in-1 Wireless Charging Station
- 1 x 18W QC 3.0 Adapter
- 1 x 3.3 ft USB-C Charging Cable
- 1 x User Manual

Features

1. **3-in-1 Design for Charging**
   The Anlmz CW350 lets you charge your phone, smartwatch, and wireless earbuds all at the same time, so you don't have to use multiple charging cords. Because it has a wide-range induction coil built in, it charges Apple and Qi-enabled devices quickly and easily.
2. **Compatible with all devices**
   It works with many devices, such as iPhones (from the iPhone 8 to the newest models like the iPhone 16 Pro Max), Apple Watches (Series 1–9, SE, and Ultra 1/2), and AirPods (models that support MagSafe charging cases). It also works with Samsung and other Qi-enabled devices, so people who have more than one brand can use it.
3. **Charges Quickly**
   With its optimal output power, the charging station makes sure that your devices are fully charged in three hours. It has a trickle safety mode that turns on immediately when the device is fully charged. This keeps the battery from overcharging and increases its lifespan.

FAST CHARGING WITH 18W ADAPTER

10w — Mobile Phone

3w — Apple Watch

5w — AirPods

75% Charged

4. **Small and Lightweight Design**

The Anlmz CW350 is great for travel or small rooms because it is thin and light. Its slim form saves room, keeps things neat, and improves the look of your desk or nightstand.

LIGHTWEIGHT AND SPACE-SAVING DESIGN

5. **Features that make it safer**

   The charger has built-in safety features that keep both your devices and the charger safe. These include overcharge protection, temperature control, and short-circuit prevention. If magnets or metal devices are found, the charger will stop charging right away to keep them from getting damaged.

6. **Low-Slip Surface**

   The charging pads have non-slip rubber surfaces that keep your devices in place while they're charging, making sure that the experience is stable and safe.

7. **LED Lights for Signs**

   Each device's charging state is shown by a soft blue LED light. The light is made to be soft, so you can use it next to your bed without waking you up. If metal or credit cards are identified, the LED goes off because they are not suitable.

8. **Built to last and of high quality**

   The CW350 is made of high-quality ABS material, which lets heat escape quickly and lasts a long time. Its form that uses little energy makes it even more efficient.

9. **Design for ease of use**
   - The charging stand gives you clear visual input with its LED lights.
   - It's made to hold cases that are up to 5 mm (0.2 inches) thick, but for best performance, bigger cases should be taken out.
   - Make sure that the devices are lined up correctly with the charging pad so that they don't get too hot or charge unevenly.

10. **Managing the cables**

A built-in design keeps the charging wire nicely organized, cutting down on tangles and making the setup look nice.

Usage

1. **Setup:**
   - Connect the Anlmz CW350 to a power outlet using the included USB-C cable and QC 3.0 power adapter.
2. **Charging Devices:**
   - Place your smartphone on the larger pad for wireless charging.
   - Position your smartwatch on the dedicated magnetic charging spot.
   - Place your earbuds on the smaller pad designed for wireless earbuds.
3. **LED Indicators:**
   - **Blue light:** Charging in progress.
   - **Greenlight:** Device fully charged.
   - **Flashing light**: Indicates a foreign object or improper placement.
4. **Additional Notes**:
   - Avoid using cases thicker than 5mm (0.2 inches).
   - Remove metal accessories or credit cards from your devices before charging.

Care and Maintenance

1. **Keep it Clean:**
   - Use a soft, dry cloth to wipe the charging station regularly. Avoid using harsh chemicals or abrasive materials.
2. **Avoid Overheating:**
   - Place the station in a cool, ventilated area and avoid direct sunlight.
3. **Cable Care:**
   - Ensure the USB-C cable is not bent or damaged during use.
4. **Proper Storage:**
   - Store the charging station in a safe, dry place when not in use.
5. **Use the Included Adapter:**
   - Always use the provided QC 3.0 adapter to ensure optimal performance and safety.

Troubleshooting

1. **Device Not Charging:**
   - Ensure the charging station is connected to a power source.
   - Check for proper alignment of the device on the charging pad.
   - Verify that the device supports wireless charging.
2. **Overheating:**
   - Ensure the station is not placed in a hot or enclosed area.
   - Remove any cases or metal objects from the device before charging.
3. **LED Flashing Continuously:**
   - Remove any foreign objects from the charging pad.

- Realign the device to ensure proper placement.

4. **Slow Charging:**
    - Use the included QC 3.0 adapter for optimal charging speed.
    - Ensure the power source meets the required input voltage.

5. **Charger Not Working:**
    - Check the USB-C cable and adapter for any signs of damage.
    - Try connecting the charger to a different power outlet.

Pros and Cons

Pros	Cons
Compact design suitable for travel	Some users report intermittent charging issues
Fast charging capabilities	May not be compatible with all cases
Multi-device support	Limited color options

FAQs

What is the Anlmz CW350 3-in-1 Wireless Charging Station designed for?

The Anlmz CW350 is designed for charging smartphones, smartwatches, and wireless earbuds simultaneously, making it ideal for Apple, Samsung, and other Qi-enabled devices.

How does the Anlmz CW350 ensure device safety during charging?

The Anlmz CW350 includes advanced safety features such as overcharge protection, temperature control, and short-circuit prevention, ensuring safe charging for all devices.

What materials is the Anlmz CW350 made of?

What materials is the Anlmz CW350 made of?

The Anlmz CW350 is constructed from high-quality ABS plastic and silicone, offering durability and a stable anti-slip surface.

What input voltage does the Anlmz CW350 require for proper functioning?

The Anlmz CW350 requires an input voltage of 9V/2A or 12V/1.5A to operate efficiently.

How does the Anlmz CW350 reduce cable clutter?

The Anlmz CW350 features an integrated cable management system, which minimizes messy wires and keeps your workspace tidy.

What happens if the device overheats while using the Anlmz CW350?

The Anlmz CW350 is equipped with temperature control to prevent overheating and will stop charging automatically if the temperature exceeds safe limits.

What type of LED indicators does the Anlmz CW350 have?

The Anlmz CW350 has soft blue LED indicators to show the charging status without being too bright or disruptive during the night.

What should I do if my Anlmz CW350 stops charging a device?

If the Anlmz CW350 stops charging, ensure that the device is aligned with the charging coil, remove any metal objects or thick cases, and check the power adapter connection.
