Anolis Agame LED Lighting

Product Information

Specifications:

- Brand: Agame
- Model: Not specified
- Version: 1.0
- Usage: Outdoor
- Power Source: AC Power
- Protection Class: III
- Light Emission: LED

Product Usage Instructions

Safety Instructions:

Dangerous voltage constituting a risk of electric shock is present within this unit. Always disconnect the fixture from power before cleaning, servicing, or installing. Only operate the fixture from the type of power source indicated on the marking label. Do not install the unit near an open flame. Avoid connecting the fixture to a dimmer pack. Do not look directly into the beam from a short distance without suitable protective eyewear. Ensure the fixture is not exposed to extreme heat or dust during installation. Avoid locations subject to possible impacts. Do not cover the fixture body with cloth or materials during operation. Allow the fixture to cool before servicing.

Fixture Exterior View:

Standard Version:

- Transparent plastic cover
- Supply cable
- Top cover
- Stainless steel base

Control and Connection:

The Agame modules should be connected to the E-Box Remote or E-Box Remote Basic via junction boxes. The modules have to be operated in Pass-Through mode. Ensure correct connection as per provided examples.

Frequently Asked Questions (FAQ):

1. Can the fixture be used underwater?

No, this fixture was designed for outdoor use and must not be used for underwater installation.

2. How many Agames can be connected to one E-Box Remote/E-Box Remote Basic?

The maximum number of Agames connected to one E-Box Remote/E-Box Remote Basic is 40, but they have to be operated in Pass-Through mode, allowing a maximum of 32 Agames connected in one string.

This device has left our premises in absolutely perfect condition. In order to maintain this condition and to ensure safe operation, it is absolutely necessary for the user to follow the safety instructions and warnings written in this manual.

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorized modification to the device. Unauthorized modification will void warranty.

Safety instructions

DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT!

- Always disconnect the fixture from power before cleaning, servicing or installing.
- This fixture should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized distributor or local power company.
- Always disconnect the fixture from AC power before servicing or cleaning.
- Make sure the power/data cable is not damaged by sharp edges.
- Do not install the unit near an open flame.
- Refer servicing to qualified service personnel.
- Do not connect this fixture to a dimmer pack.
- This fixture falls under protection class III.
- LED light emission. Risk of eye injury. Do not look into the beam from a short distance without suitable protective eyewear. Do not look at LEDs with magnifiers or similar optical instruments that may concentrate the light output.
- The fixture was designed for outdoor use. This fixture must not be used for underwater installation.
- When choosing the installation spot, please make sure that the fixture is not exposed to extreme heat or dust.
- Avoid using the unit in locations subject to possible impacts.

The fixture body never must be covered with cloth or other materials when the fixture is under operation.

- Only operate the fixture after having checked that the housing is firmly closed and all screws are tightly fastened.
- The fixture becomes hot during operation. Allow the fixture to cool approximately 30 minutes prior to servicing or maintenance.
- Please consider that unauthorized modifications on the fixture are forbidden due to safety reasons!

Agame

- Please use the original packaging if the fixture is to be transported.
- If this device will be operated in any way different to the one described in this manual, the product may suffer damages and the warranty becomes void. Furthermore, any other operation may lead to dangers like short-circuit, burns, electric shock etc.
- The product (covers and cables) must not be exposed to a high frequency electromagnetic field higher than

3V/m.

- Immunity of the equipment is designed according to the standard EN 55035 Electromagnetic compatibility of multimedia equipment – Immunity requirements.
- Emission of the equipment complies with the standard EN55032 Electromagnetic compatibility of multimedia equipment – Emission Requirements according to class B.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

FCC STATEMENT

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning for fixtures with Harsh Environment Finish (HEF):

- Handle with care!
- Avoid any damage to the painted surface.
- Damaging the paint may result in corrosion and loss of warranty.

Fixture exterior view

1. Transparent plastic cover
2. Supply cable
3. Top cover
4. Stainless steel base

Control and connection

The Agame modules should be connected to the E-Box Remote or E-Box Remote basic via junction boxes. The Agame modules have to be operated in Pass-Through mode.

The E-box Remote has to be switched to the Pass-Through mode.

Example of connection with E-box Remote

Agame

Example of connection with E-box Remote Basic

Note. Combination of Agames amd Calummas XS or Emineres Remote is possible. Example:

From point of view of driver load (E-box Remote/E-box Remote Basic), max. number of Agames connected to one E- box Remote/E-box Remote Basic is 40 but Agames have to be operated in the Pass-through mode, it means that max. 32 Agames can be connected in one string. Max. number of Agames connected to the E-box Remote/E- box Remote Basic also depends on cable length.

E- box Remote

Cable length *	Max. number of Agames
50 m	25 per output, 40 in total
100 m	20 per output, 40 in total

E-box Remote Basic

Cable length *	Max. number of Agames
50 m	25
100 m	20

* Cable length is a total cable length on both LED outputs. Example:

Total cable length= $L1+L2+L3+L4+L5+L6+L7+L8+L9$

Installation

Mounting the fixture

1. Remove the top cover (3) from the fixture. The top cover is fastened to the base (4) by means of two spring locks in this cover and you do not need any instruments to remove it .
 - Push your thumbs on the plastic cover (1) and by means of your fingers pull the top cover (3) up.
 - The top cover (3) is secured to the base (4) by the safety wire (5).

- The Agame can be fastened in any orientation on a flat, non-flammable surface by means of two mounting openings (6).
- For the rear version of the Agame, prepare suitable hole for cable gland (7) in the mounting surface.

- The three adjusting screws (8) allows you to align the base of Agame in a horizontal plane, use an Allen key 2.5 adjusting the plane of the Agame base.

- Ensure that the structure to which you are attaching the fixture is secure.

Connection to power

The unit must be installed by a qualified electrician in accordance with all national and local electrical and construction codes and regulations.

Junction box installation

Junction box with one output

Junction box with four outputs

1. Unscrew the four screws (1) from the cover (2) on the junction box to get access to the DPS with terminal blocks (3) and two mounting holes (4).
2. Screw the junction box on a non-flammable flat surface.
3. Connect cables to terminal blocks.

Two cable glands M20 x 1.5 serves for a power/data cable. One (or four) cable gland M12 x 1.5 serves for Agame connection cable. Remove the end cap from the cable gland before passing the cable. We recommend to apply an adequate layer of the paste LOCTITE 5331 on the plastic holder of the cable gland before inserting it into the body of the gland.

Cable gland M20x1.5 and M12x1.5

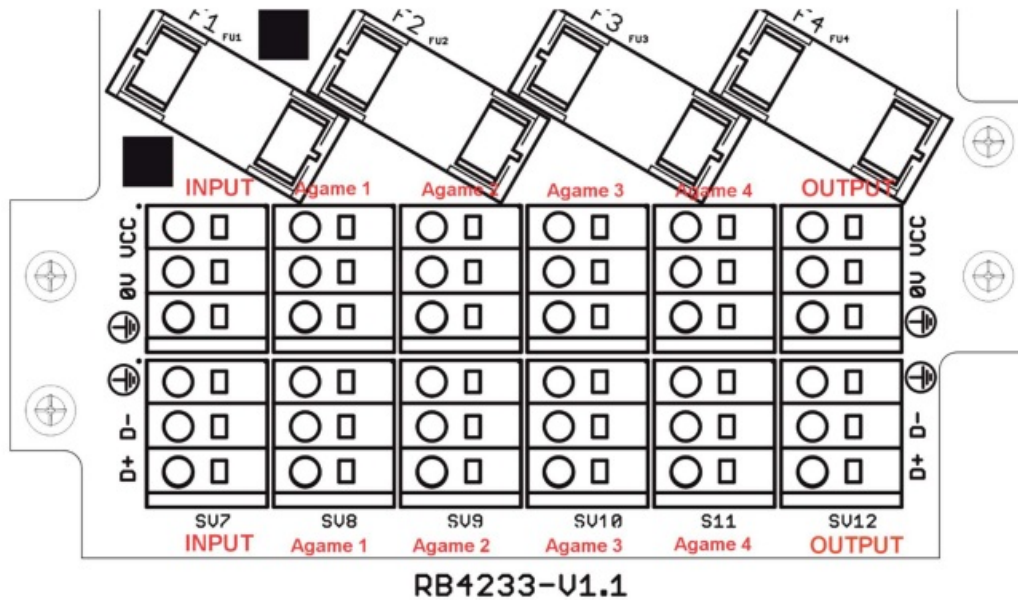

Wiring of connection blocks on DPS RB4232 in the junction box with one LED output.

Fuse F1: 2A/500V AC.

Wiring of connection blocks on DPS RB4233 in the junction box with four LED outputs.

Fuse F1-F4: 2A/500V AC.

Agame connection

CE

Connector	Vcc	D+	D-	0V	
Function	LEDs +	Data +	Data –	LEDs –	Not connected

Function	LEDs +	Data +	Data –	LEDs –	Ground
Colour of wire	Red	Orange	White	Black	Yellow/green

Colours of wires apply to the 5-cored cable SJTW 5x 14AWG (P/N 1305 3336).

NOTE: Each DMX line of Agames connected to the LED output of the E-box Remote has to be terminated at the last fixture. Connect a 120 Ohm resistor between terminals D+ and D- in the last junction box.

Example:

RB4232-V1.1

RB4233-V1.1

Screw the cover (2) back on the junction box.

Example of Control panel in RDM manager

The software RDM manager is available on the ROBE website (<https://www.robe.cz/support>), product RUNIT WTX.

Device: 52:53-01:2e:00:7f

[-] Product information

RDM protocol version: 0x0100

Device model ID: 0x012e

Product category: 0x0102

Software version: 23

Subdevice count: 0

Sensor count: 2

Manufacturer label: ROBE lighting s.r.o.

Device model description: Agame

Device label:

[-] DMX512 setup

DMX512 footprint: 4

Current personality: DMX Preset 01- 4

Personalities count: 16

DMX address: 1

[-] Power/amp setup

Changing and saving values in this item will affect calibrated white colour(s) of the Agame . Insect friendly light – the item effects RGBA Agame only. If the item is on, blue colour is not used in calibrated white colours. This modification of white lights results in a smaller attraction of white light for insects (mosquitos, moths..). The function is also available from DMX chart (channel Special Function, range 7-10 DMX).

- WiFi unlink – the item is inactive for Agame.
- Terminator active – the item is inactive for Agame
- Agame

Software update

- Software update of Agame modules has to be done by means of the software ROBE Uploader running on PC. The ROBE Uploader is a software for automatized software update of ROBE fixtures. The ROBE Uploader switches Agames to the update mode automatically.
- Please see <https://www.robe.cz/robe-uploader/> for more information.

Note: Agame modules in ON/OFF connection cannot be updated.
The Agame modules should be operated in the Pass-Through mode.

To update Agames including the E-box Remote:.

1. Update connected LED modules by means of the file Agame.lib in the ROBE Uploader.
2. Set the E-box Remote to the Standard mode and switch it off/on. Use the file EminereEbox.lib in the ROBE Uploader for software update of the E-box Remote.
3. After updating the E-box Remote, set the E-box Remote to the Pass-Through mode and switch it off/on.

Examples of connection for software update

1. By means of DMX connection and Robe Universal Interface.

Anolis-Agame-LED-Lighting- (4)

2. By means of the Ethernet connection

Anolis-Agame-LED-Lighting- (5)

Technical specifications

Power supply

- Input voltage: 48 V
- Power consumption: 8 W

Optical

- Light source: 4 high power LEDs
- Colour variants: RGBW (W – 6500 K), RGBA
- Beam width: 6°, 10°, 20°, 30°
- Projected Lumen Maintenance: L90B10 >90.000 hrs, Ta = 25°C / 77°F

Compatible drivers

- E-box Remote
- E-box Remote Basic

Mounting method

- Via two mounting apertures

Housing

- High pressure die-cast aluminium body
- Transparent plastic

Cooling system

- Convection

Total heat dissipation

- 21 BTU/h (calculated)

Protection factor

- CE: IP 67 (IP 66 junction box)
- US: Suitable for wet location

Impact rating

- IK10

Operating ambient temperature range

- -20°C /+45°C (-4°F /+113°F)

Operating temperature

- +75°C @ ambient 35°C (167°F @ambient 95°F)

Connection

- Via E-box Remote/E-box Remote Basic Agame IN: cable UL 20969 5x 20AWG (P/N 13053481), length 1m
standard Interconnecting cable between junction boxes: SJTW 5x 14AWG (P/N 13053336) Junction Box for Calumma XS, (1x Output)
Junction Box for Calumma XS, (4x Output)

Weight

- 0.45 kg (0.99 lbs)

Dimensions (All dimensions in mm [inch])

Standard version

Anolis-Agame-LED-Lighting- (18)

Rear version

Included items

- 1 x Agame
- 1 x User manual

Optional accessories

Junction Box for Calumma XS, 1x Output, Ral 9011 (P/N 10980715) Junction Box for Calumma XS, 4x Output, Ral 9011 (P/N 10980716) Cable SJTW 5x 14AWG (P/N 13053336)

Cleaning and maintenance

DANGER !

Disconnect from the mains before starting any maintenance or cleaning work

- Rinse off loose dirt with low pressure water spray. Wash the housing with a soft brush or sponge and a mild, non-abrasive washing detergent. Rinse it.
- Maintenance and service operations are only to be carried out by a qualified person.
- Should you need any spare parts, please use ROBE OEM parts.

Disposing of the product

To preserve the environment please dispose or recycle this product at the end of its life according to the local regulations and codes.

ChangeLog
