ANPVIZ H Series Network Camera
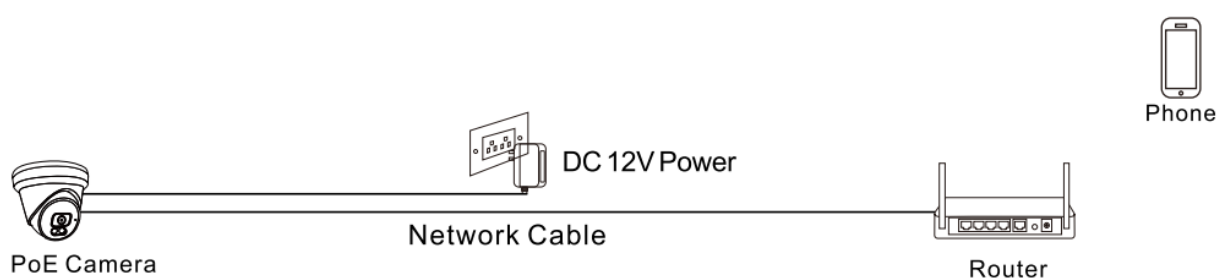

Activate The Camera

How to activate the camera before using it?

- **Connection Diagram**
  - Works with PoE

  - Works with DC Power

The camera supports DC 48V PoE Switch/Injector or DC 12V power adapter.If you don't have NVR, you can choose one of these two connection methods to connect it to the same network as PC or smartphone.
Note: The router can't power the camera.

Operation

The operation is as follows:

1. **Activate camera via PC**

1. Download and install the SADP Tool on Anpviz Official Website.
2. Search And Activate the camera via SADP Tool.
3. Log in the camera on web browser (e.g. Edge/ Chrome/Firefox)
4. Install the plug-in to preview live video and enable the App Platform access.
5. Download the mobile App (Guarding Vision, Anpviz Viewer or Hik-Connect) to register and login your account.

Use SADP to
Activate and Add

6. Scan to add camera to smartphone app.

   Path to SADP download link: **www.anpvizsecurity.com**

   Support➔Download Center➔Download➔SADP Tool

   You can scan the QR code to see the detailed operation video

Activate and Add

Connecting NVR system to use

Plug and Play with Anpviz H NVR/ Hikvision/Hikvision OEM NVR

1. If you have Anpviz H Series NVR, Hikvision or Hikvision OEM NVR, L TS Platinum Series, Annke, etc.

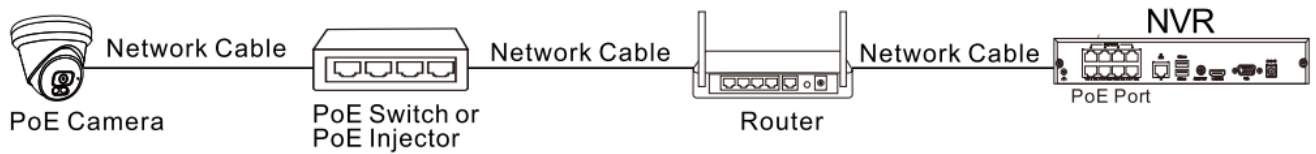

Note: There is no need to activate the camera, just connect the camera directly to the PoE port of these NV Rs via the network cable and wait for the connection.

2. If you have other brands of NVR, you need to activate the camera (via PC or APP) to set the camera IP, and

then connect to a third party NVR such as Dahua, Univiewor other brands.

Works with PoE

Detailed operation can be viewed in the user manual or scanning code to view the video, If you need support, please contact us: **support@anpvizsecurity.com**
