Fn+F11	(airplane icon)	Airplane Mode	Enable/disable the Airplane Mode function.
Fn+Space	(keyboard icon)	Keyboard Backlight Toggle	Turn the keyboard backlight on and off.

Recovery Guide
System recovery (Restore your laptop operating system) When something is going wrong with the laptop operating system, the storage of the laptop has a hidden partition containing a full back up image of the operating system that can be used to restore the system to factory default settings. Note y If the storage has been switched or the partition deleted, the recovery option will no longer be available and a recovery service will be needed. y The recovery function is only available on devices with O/S preinstalled. Devices with EFI SHELL do not have the recovery function.
Launch system recovery
The system recovery feature is preinstalled before the laptop is shipped from the factory. The
option menu allows you to launch the Windows recovery tool to reinstall the operating system to factory default. The brief introduction below will show you how to start the recovery tool and restore your system.

Windows 10 Recovery Guide

1. Turn off and restart the laptop.

2. During the laptop turn on process, press and hold F9 key to launch the tool.

3. Choose "Troubleshoot" to enter the recovery settings. (Also you can choose "Continue" to exit the recovery system and continue to Windows 10 for fles or data backup.) There are two options for system recovery

Reset this PC –

You can choose to keep or remove your files and then reinstalls Windows without losing your fles.

AORUS Smart Recovery –

Your PC settings will be restored to factory default settings. Caution: All personal data nd fles will be lost.

4. **AORUS Smart Recovery**

The recovery will be activated and you will see the option buttons on the window. Click on "Yes" to start it.

Caution

Once the "Recovery" is selected, your personal data and fles will be deleted after the laptop starts restoring, and the operating system will be reset to factory default settings.

A progress indicator bar will show on the window when the recovery process is running. Please make sure the AC adapter is plugged in and do not turn off the laptop. After the system recovery is completed, you will see the options button on the window, please click on "Shutdown".
