APEXFORGE V1 Portable Tripod

Tripod Introduction

Panning, pitching and 90-degree shooting operation (Fig.2)

- Rotating the horizontal locking knob counter-clockwise to loosen for smooth consistent panning, rotating oppositely to tight it.
- Rotating the handlebar counter-clockwise to loosen for smooth consistent tilting, Rotating oppositely to tight the tilt knob.
- Rotating the vertical flip knob counter-clockwise to adjust the angle of the loading plate, flip up to 90 degree. Rotating oppositely to tight it.

Raising and Lowering the Center Column. (Fig.3)

To raise or lower the center column, turn the center locking knob counter-clockwise and set the column to the desired position. While holding the column in position, turn the column locking knob clockwise to secure the column in place. Don't over tighten the center column lock, as this could damage the threads.

Extend and fold the leg. (Fig 4,5)

Each Leg section can be adjusted to the desired length by opening the Flip Lock Lever so the Leg is free to slide in or out. Once the desired length is achieved, snap the Flip Lock Lever closed, so that the Leg Section is securely locked. Repeat this step for each Leg and each Section until the Tripod is set to the desired height.

Warnings

- **Minimum Height:** 50cm

FAQ

Q: Can I use this tripod with a heavy DSLR camera?

A: The tripod has a maximum load capacity of 5kg, so it should be suitable for most DSLR cameras.

Q: How do I clean and maintain the tripod?

A: Use a damp cloth to clean the tripod if necessary. Avoid using lubricants unless specified. Regularly check for any loose parts and tighten them as needed.
