**Apple Wireless Bluetooth Magic Keyboard**

## Welcome to your Apple Magic Keyboard

Your Apple Magic Keyboard has a rechargeable battery and uses Bluetooth® technology to connect wirelessly to your Mac.

This guide shows you how to use your Magic Keyboard, including pairing, customization, and recharging the battery.

## Update your software

To use your Magic Keyboard and its full range of features, update your Mac to the latest version of macOS (the minimum requirement is OS X 10.11).

To update to the latest version of macOS, choose Apple menu > App Store to see if there are updates. Follow the onscreen instructions to update macOS.

## Set up your Magic Keyboard

To pair your Magic Keyboard with your Mac, use the Lightning to USB cable that came with your keyboard. Plug the Lightning end into the Lightning port on your keyboard, and the USB end into a USB port on your Mac. Slide the keyboard on/off switch to on (so you see green on the switch).

Your keyboard will pair automatically with your Mac.

After the keyboard is paired, you can disconnect the cable and use your keyboard wirelessly.

## Customize your Magic Keyboard

Change the modifier keys, assign keyboard shortcuts to menu commands in macOS applications and the Finder, and more.

### To customize your Magic Keyboard:

1. Choose Apple menu > System Preferences, then click Keyboard.
2. Click Keyboard, Text, Shortcuts, or Input Sources to customize the keyboard.

## Use the function keys

Use the function keys at the top of the keyboard to adjust the brightness of display, open Mission Control, access applications with Launchpad, control the volume, and more.

	Decrease or increase the brightness of the Mac display.
	Open Mission Control for a comprehensive view of what's running on your Mac, including Dashboard, all your spaces, and all open windows.
	Open Launchpad to instantly see all of the applications on your Mac. Click an application to open it.
	Rewind or go to the previous song, movie, or slideshow.
	Play or pause songs, movies, or slideshows.
	Fast-forward or go to the next song, movie, or slideshow.
	Mute the sound coming from the speakers or headphone port on your Mac.
	Decrease or increase the volume of sound coming from the speakers or headphone port on your Mac.
	Press and hold the Media Eject key to eject a disc.

## Rename your Magic Keyboard

Your Mac automatically gives your Magic Keyboard a unique name the first time you pair it. You can rename it in Bluetooth preferences.

### To rename your keyboard:

1. Choose Apple menu > System Preferences, then click Bluetooth.
2. Control-click the keyboard, then choose Rename.
3. Enter a name and click OK.

## Recharge the battery

Use the Lightning to USB cable that came with your keyboard. Plug the Lightning end into the Lightning port on your keyboard, and the USB end into a USB port on your Mac or a USB power adapter. To check the battery status, choose Apple menu > System Preferences, then click Keyboard. The battery level is shown in the lower-left corner.

**Note:** When you aren't using the Magic Keyboard, it goes to sleep to conserve battery power. If you won't be using your keyboard for an extended period, turn it off to conserve even more power.

## Remove a pairing

- After you pair your Magic Keyboard with a Mac, you can pair it again with a different Mac.
- To do this, remove the existing pairing and then pair the keyboard again.

## To remove a pairing:

1. Choose Apple menu > System Preferences, then click Bluetooth.
2. Select the keyboard, then click the Delete button  next to the keyboard name.

## Clean your Magic Keyboard

To clean the outside of your keyboard, use a lint-free cloth. Don't get moisture in any openings or use aerosol sprays, solvents, or abrasives.

## Ergonomics

1. When using your Magic Keyboard, it's important to find a comfortable posture, change your position often, and take frequent breaks.
2. For information about ergonomics, health, and safety, visit the ergonomics website at [www.apple.com/about/ergonomics](http://www.apple.com/about/ergonomics).

## Battery

1. Your Magic Keyboard contains no user-serviceable parts.
2. Don't attempt to open or disassemble your Magic Keyboard, remove, crush, or puncture the battery in your Magic Keyboard, or expose it to high temperatures or liquids.
3. Disassembling your Magic Keyboard may damage it or may cause injury to you.
4. The lithium-ion battery in your Magic Keyboard should be serviced or recycled by Apple or an authorized service provider, and disposed of separately from household waste.
5. For information about Apple lithium-ion batteries, go to [www.apple.com/batteries](http://www.apple.com/batteries).

## More information

- For more information about using your keyboard, open Mac Help and search for "keyboard."
- For support and troubleshooting information, user discussions, and the latest Apple software downloads, go to [www.apple.com/support](http://www.apple.com/support).

## FAQs

What brand manufactures the Magic Keyboard?

Apple manufactures the Magic Keyboard, ensuring high quality and performance.
