Apps ELD App

Install & Connect ELD

- Locate the ECM (diagnostic) port.
- Locate the ECM (diagnostic) port inside of your vehicle. Look for 9-pin or 6-pin circular ports in heavy-duty vehicles. Look for OBDII port in light/medium duty vehicles.

Install ELD

- Simply plug the provided cable into a vehicle ECM (diagnostic) and attach the other end to the ELD device. The dual fastener is provided for dash mounting.
- Log into the Elite Power Unit Logbook App
- Log in to the Elite Power Unit Logbook App on your tablet/smartphone with a username and password created during a signup process or provided by a fleet manager.

Connect ELD

- Select a vehicle from a list of available vehicles and your device will attempt to connect to ELD via Bluetooth. The green Bluetooth indicator at the top right corner means you are ready to start using ELD.

Duty Status

Hey, Charles

Click on begin connection to start the ELD operation while on duty.

Logging Your Duty Status

Access the Main Screen

Once you’ve successfully logged in to the ELD app, you will land on the main screen. This screen provides an overview of your current duty status and other vital information.

Update Your Status

To change your duty status, locate and tap on the Status button. A list of available statuses, including Off Duty, Drivingn Duty, and Sleeper will appear. Yard Moves and Personal Use will be available if pre-configured by your fleet manager. Choose the appropriate status by tapping on it.

Managing HOS Records

Access Your Logs

Navigate to the Logs section within the ELD app to gain access to your electronic HOS records. This feature allows you to review your duty status changes over different dates, providing a comprehensive overview of your driving activities.

Detailed Information

To see detailed HOS records, simply tap on a specific date. This action will open up a detailed view of each duty status you've recorded. You'll find essential information such as the exact time, duration, and specific locations, etc.

Managing HOS Records

Edit with Caution

- The ELD app allows edits to be made in accordance with FMCSA guidelines.
- It is important to note that automatically recorded driving time cannot be under any circumstance. However, you can still make adjustments to other duty status entries. To edit, tap on the pencil icon beside the respective entry. If you need to insert a past duty status that you inadvertently missed, use the "Create" button to add it.

Driver Vehicle Inspection Reports (DVIRs) Driver Vehicle Inspection Reports (DVIRs)

- Easily initiate the process of creating pre- or post-trip inspection reports by tapping the "+" sign. This intuitive action ensures that you comprehensively document the condition of your vehicle before and after each journey, enhancing safety and compliance.
- Take a proactive step in vehicle maintenance by promptly notifying your mechanic of any identified defects or issues from the inspection. This helps to keep your vehicle in optimal working condition, contributing to efficient operations and reduced downtime.
- Easily initiate the process of creating pre- or post-trip inspection reports by tapping the "+" sign. This intuitive action ensures that you comprehensively document the condition of your vehicle before and after each journey, enhancing safety and compliance.
- Take a proactive step in vehicle maintenance by promptly notifying your mechanic of any identified defects or issues from the inspection. This helps to keep your vehicle in optimal working condition, contributing to efficient operations and reduced downtime.

DOT Inspection Mode

- Facilitate seamless roadside inspections by providing your device to officers. They can easily navigate through your logs, ensuring a hassle-free inspection process.
- DOT Inspection Mode
- Access the DOT Inspection mode via the side menu.
- When prompted by the officer, tap the "Data Transfer" option within the DOT Inspection mode. This will transfer your logs to Web Service.
- There is also an option to email logs to certain email addresses.

Offline Mode

- Experience uninterrupted performance even when your device encounters a loss of cellular signal. The app seamlessly transitions to an offline mode, ensuring your logging process remains unaffected.
- When connectivity is restored, rest assured that all logs recorded during the offline period will be automatically synchronized with the app. This intelligent feature guarantees that your data is always up-to-date and accurately reflects your duty status.
- Additionally, you have the option to manually prompt synchronization with the server by tapping the “Sync” icon in the app’s action bar.
