Contents

mina App For IOS and Android

- In Device settings turn on your personal Hotspot.

- ⚠️ Apple disables this function if no mobile signal is present.

  Android Devices not affected!

- Closedown all running screens and apps in the background of your Device for best performance.

X40 System Start Up Sequence:

- To power up the X40 push Power Button found on the side of the X40. The button will flash blue and turn a solid blue after a few seconds. The X40 is now on and ready to use.
- Plug your compatible/original Device lead into USBC Port
- Attach the other end to your Device. Your Device will ask you to trust this computer. Select YES
- Go to the MINA App and select Pair with Inspection System This puts the system into looksee and basic record mode.
- For extra functions upgrade by pushing the star icon in the bottom left-hand corner and subscribe. This unlocks Text Overlay, Meterage and Sonde Functions.

X40 System Shut Down Sequence:

- To power down the system push and hold the Power button until it flashes rapidly then release.
- Remove Device and lead.

Compatible with the latest three IOS software releases
