Soluno Sync Contacts From The Apps User Guide

Did you know you can sync your contacts from the Solano app to your local contacts? Follow these steps to sync your contacts.

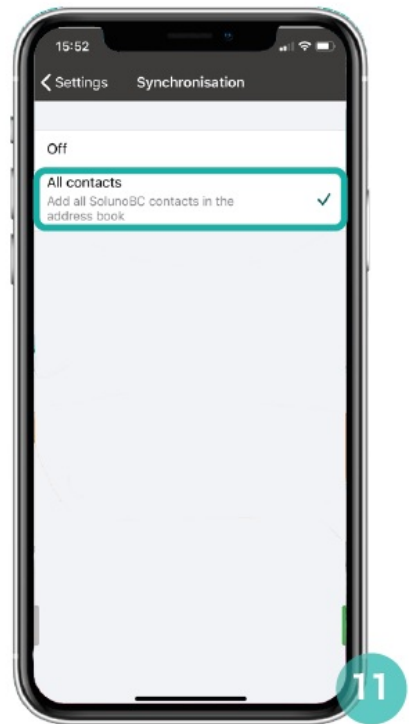

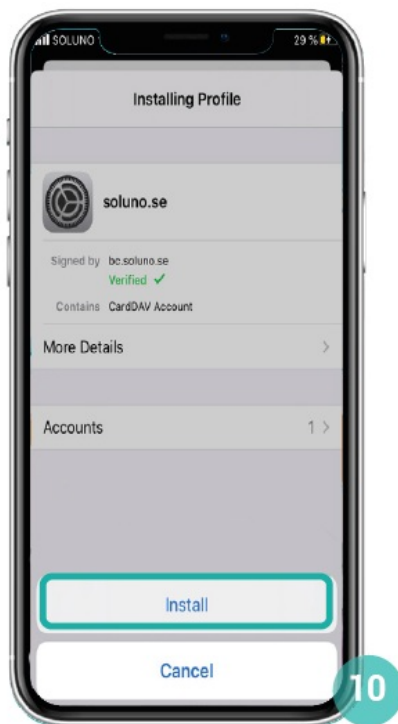

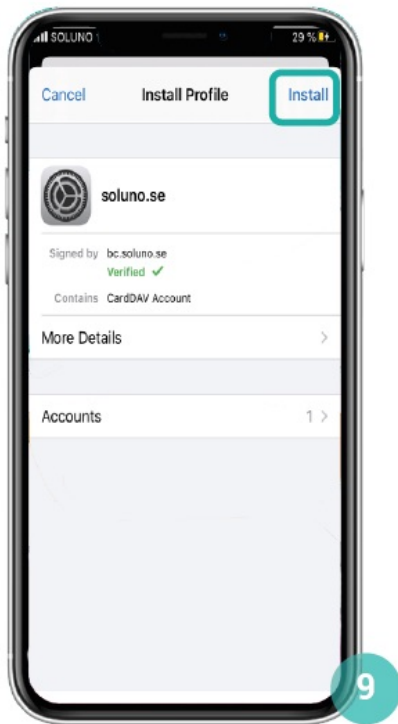

1. Open the app and go to Settings.
2. Then click Sync.
3. If you already have a profile that allows your app to synchronize your contacts, just click on All Contacts. Then you're done.
4. If you do not have a profile that allows synchronization, you must install it. Click on All, and you will come to a guide. Click Show me how.
5. Scroll through the steps in the wizard until you reach the last step. There you click on Install Profile.

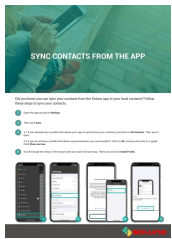

6. This will take you to a configuration page download page. Click Download.
7. Then click Allow.
8. Click Close.
9. Then open your Settings app. Click on Profile Downloaded.

10. Click Install in the upper right corner.
11. Chose Install.
12. Then open the Solano app again and check All contacts.
