### Apps Storefront App

## Disclaimer

To promote community health during the outbreak of COVID-19, Munson Healthcare staff whose job duties do not require them to be on-site will be provided with solutions to work from home. For staff who do not already have a Munson-provisioned workstation with Checkpoint VPN, Storefront access is available. If there is a legitimate business reason why these standards are not viable options in the short term, an IS may provide an alternative access method. The safety of Munson Healthcare workforce members, patients, and their data is a priority and as such, temporary remote access measures will be revoked once operations return to normal. For more information see Munson's Information Technology Access Control Policy.

## INTRODUCTION

1. Find and Launch the Google Play Store App

2. Tap on Search and Enter "Citrix Workspace"
3. Tap on the Citrix Workspace App and Select Install

4. Launch the Citrix Workspace App.
5. Allow At Minimum the Permissions Labeled: Required to Function.
  1. Access Device Files – Required to Function

2. Access for Phone Calls – Not Required

3. Access to Record Audio – Not Required, unless you are specifically recording audio in a Storefront App.

4. Access to Device Location – Not Required

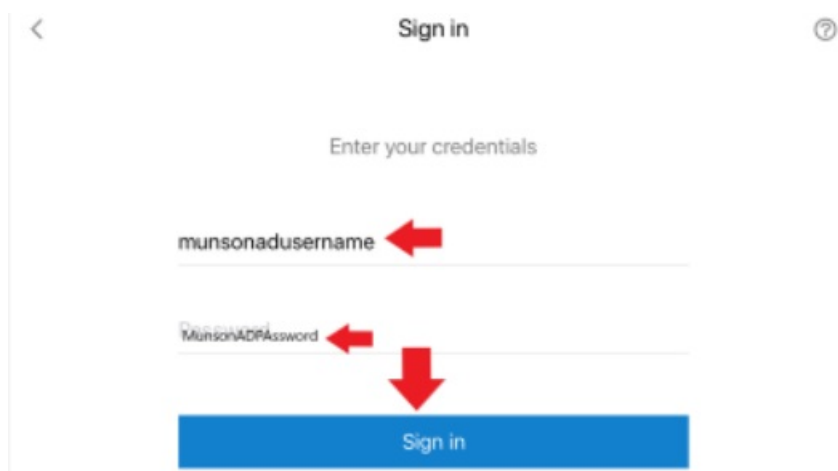

6. Select "Get Started"

7. Enter: "Storefront.mhc.net" into the "Email Address or Store URL" Field. Select Continue

8. Enter the User's Munson AD Username and Password and Select Continue

9. Accept the 2FA Prompt

1. If you have not Setup Two factors, please go to the Section at the End of this Guide Titled: Android/Phone/Tablet Two Factor Enrollment Guide.
2. If you are set up for the Imprivata App for 2FA you will receive the Approve/Deny Prompt Below. Select the Approve Button.

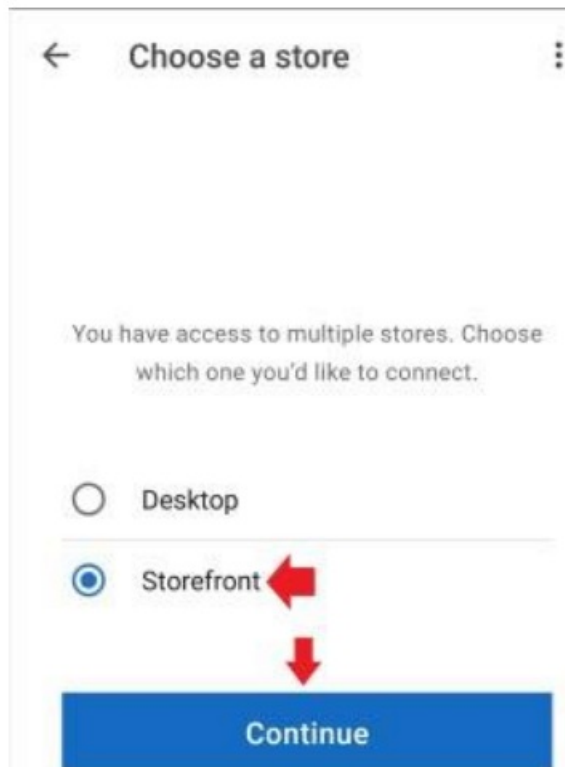

3. If you are set up with Text Messaging for Two Factor, you will come to another screen that prompts for the 6-digit code that was Texted to your phone. Enter the code that was Texted.
4. **Note:** If you do not accept the 2FA prompt, you will receive the following screen below. Tap on Dismiss

and Trying Following Steps 7-8 Again, to set up Munson Storefront. This time Accepting/Following the Two Factor Prompt.

10. Select the "Storefront" Store, and Select Continue.

11. Select an App, and Verify it launches.

## Storefront: Android/Phone/Tablet Two-Factor Enrollment Guide

Please read through the login process described for each option below and select the option that best fits your personal need. You Only Need to Enroll in One of the Methods.

**Imprivata IS Smart App:** The user Starts the Computer, Connects To Their Wifi Connection, Launches Checkpoint, Enters Munson Username and Password, Selects the Approve Button on the Notification from the Imprivata ID App, and then Signs Into Windows.

**Text Message:** The user Starts the Computer, Connect To Their Wifi Connection, Launches Checkpoint, Enters Munson Username and Password, Enters the Code Texted to Their Phone, and then Sign Into Windows.

### 1. **Option 1:** Imprivata ID Smart App
