Apps WatchGas Application

WatchGas App

The WatchGas App is a mobile application designed for Android phones that allow users to connect their devices to the compliance software and monitor gas levels.

Installation Instructions

Follow the below steps to install the WatchGas App:
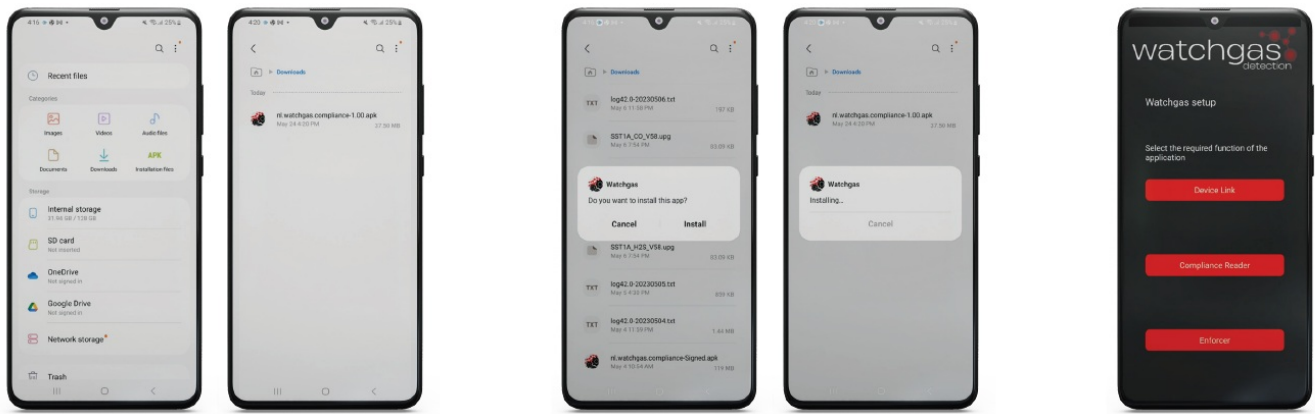

1. Download or copy the APK file to your Android phone.
2. Install the app on your phone.
3. Select the Device Link option.
   Connecting to Compliance Software
4. If you wish to connect to the compliance software, follow these additional steps
5. Activate the software
6. Type in your Site's Unique ID (provided by WatchGas)
7. Check the server status. A green light indicates that you are connected to the software
8. Select the Station name and Company name.

Once you have successfully connected to the compliance software, you can monitor gas levels and receive alerts when levels are too high or low.
