Product Usage Guide

- AP-XOUTPUT

AP-XOUTPUT Drinking Water System Extra Output Kit

IMPORTANT! The following are recommendations. Modifications or improper installation will void the warranty and the manufacturer assumes no responsibility for damage to the system or property.

Reverse osmosis system placement

- Neither your reverse osmosis system nor ice maker water line kit should be exposed to freezing temperatures.
- If the connection between the reverse osmosis system and the ice maker is further than the supplied line a pump may be needed.

Installation

- All plumbing must be completed in accordance with state and local plumbing codes
- Check your local plumbing codes in the event that installation by a licensed plumber is required.
- Specific pressure considerations for some refrigerator units may be required. Please consult your refrigerators owner’s manual or contact a local water treatment expert.
