Product & Accessories
Smart Pendant Light ×1 **Remote Control ×1** **Expansion tube ×2** **Self-tapping screw×2** **User Manual ×1**

This luminaire is only suitable for safe use in areas below altitude 2000m.

1. Please be sure to cut off power to prevent electric shock before installation.
2. Installation must be carried out in strict accordance with the instruction.
3. Improper installation may easily cause accidents such as fire, electric shock or lamp falling.
4. Installation must be performed by a qualified electrician to avoid danger.
5. "Pendant Light – Angel" hereinafter is referred to as "Pendant".

Installation Guide

Installation must be carried out in strict accordance with this user manual. In consideration that the luminaire has two parts, it is recommended that installation is performed by two qualified installation person to avoid falling and causing damage due to improper installation.

1. **Hole Drilling**
    1. Select a suitable position on the "ceiling", and the distance between the mounting holes of the suspension plate is about 430mm;
    2. Drill holes of depth -a35mm with a drill bit with diameterip6mm; put 2 expansion tubes into the holes and then lock the screws into the expansion tubes, leaving a height of 10mm.

|←— 430mm —→|

Screws leaving a height of 10mm
2. **Suspension Plate Removal – Power Cord Connection – Bottom Cover Fixing**
    1. Turn the "disassembly knob" on both ends of the "suspension plate" counterclockwise, and pry it off manually or with a screwdriver; .
    2. Peel off the power wire by 6-8mm, wind it into the hole of the suspension plate, press the terminal and insert it into the terminal port and then loosen the terminal to lock the wire.
    3. Buckle the disassembled "bottom cover" at the position of screw holes, then move to the right to lock it, and then lock the bottom cover with a screwdriver.
① Suspension Plate Removal

② Power Wire Connection

③ Bottom Cover Fixing
Attention:

1. External power wire must pass through the middle of installation bracket to avoid wire crimping while installation.

2. Keep clear the power wire, and avoid the bottom cover pressing the wire. Insecure installation may cause falling and damage.

3. Suspension Plate Fixing

1. Wrap the power wire around the "inner side slot of suspension plate", and bury the wire In the shell following the direction of the "red line", and the wire length can be adjusted;

2. Snap the upper cover back to the bottom cover, and turn the "disassembly knobs" clockwise.

Attention: Power wire can be buried in the "inner side slot of suspension plate" by a circle or a half circle.

When it is buried by one circle, the "suspension plate upper cover "together with the lamp body needs to be rotated by 180" before it can be installed.

Length adjustable
4. Balance Adjustment

   As shown in the figure, press the "red arrow" to adjust the length of both ends of the wire and adjust the Pendant to maintain horizon-tal. Use a screwdriver to fix and adjust the length the power wire.

This product works with Mijia, and can be controlled through the Xiaomi Home APP, or voice controlled by XiaoAi. "Works with mijia" and "Support XiaoAi control" are only verified at the software level. Xiaomi is not responsible for the production, standard implementation, quality supervision and other aspects of the product and the company.

Connect Xiaomi Home

Note: This product needs to be matched with XiaoAi speakers and other products to achieve intelligent control. Please scan the QR code for a list of compatible products.

https://home.mi.com/baike/index.html#/label/gateway/2

Scan QR code, or search for " Xiaomi Home " In the app store, download and install the Xiaomi Home APP; users who have installed Xiaomi Home APP will be directed to the device connection page.

Service Hotline :400-8266-966

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.

— Increase the separation between the equipment and receiver.

— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

— Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
