## Significant considerations

### Correct ways to use the device

- Directing the lens towards human eyes is prohibited in order to avoid eye damage caused by the glare of the lens after the device starts.
- Air inlet/outlet must be kept clear to avoid damage to internal electronic components caused by failure of heat dissipation.
- Tissue, cloth and other cleaning tools are prohibited to contact the lens for cleaning in order to prevent the lens from damage; Dust on the lens surface must be removed by cleaning air-blowing.
- Chemicals, detergents or clean water are prohibited for cleaning to avoid corrosion of the circuit board by rain, moisture and liquids containing minerals.
- The device and its parts, along with its accessories must be placed out of the reach of children.
- The device must be operated in dry and ventilated conditions.
- The device must be stored in temperate places, as high (low) temperatures will shorten its service life. The allowable storage and use temperature is 0 ~ 40°C.
- The drying of the device in any heating equipment (dryers, microwave ovens, etc.) is prohibited.
- Squeezing or adding shelters on the top and/or the back of the device is prohibited in order to avoid its damage.
- Dropping, striking or violently shaking the device are prohibited in order to avoid damage to the internal circuit board and optical components
- Dismantlement of the device with autonomy is prohibited. Contact after-sales services of Gammabai for any questions.
- Independent repair of any products is prohibited. Contact after-sales services of Gammabai in a timely manner for consultation or return-to-factory maintenance if there exist any failures of the device or its parts.
