## 4. MAINTENANCE AND CARE

Proper care of your Audio CD will extend its lifespan and maintain sound quality.

- **Handling:** Always hold the CD by its outer edges or by inserting a finger through the center hole. Avoid touching the reflective playing surface.
- **Cleaning:** If the disc becomes dirty, gently wipe it with a soft, lint-free cloth. Wipe from the center outwards in a straight line, not in a circular motion. Do not use abrasive cleaners or solvents.
- **Storage:** Store the CD in its original jewel case or a protective sleeve when not in use. Keep it away from direct sunlight, extreme temperatures, and high humidity.
- **Scratches:** While minor scratches may not affect playback, deep scratches can cause skipping or playback errors. Handle with care to prevent scratches.

## 5. TROUBLESHOOTING

If you encounter issues while playing your Audio CD, consider the following:

- **Disc Skipping or Freezing:**
  - Check the disc for dirt, dust, or fingerprints and clean it as described in Section 4.
  - Inspect the disc for deep scratches or cracks. Severely damaged discs may not be repairable.
  - Ensure your CD player's lens is clean. Refer to your CD player's manual for cleaning instructions.
- **No Sound:**
  - Verify that your CD player is properly connected to your audio system and that the volume is turned up.
  - Test with another audio CD to determine if the issue is with the player or the disc.
